

## Walnut Plain Sliced Veneer

**Species Color & Tone:** Walnut Plain Sliced Veneer delivers rich chocolate brown hues with charcoal, gray, or subtle purple undertones that soften to warm brown over time. It is usually used close to its natural depth or taken slightly darker, since Walnut does not convincingly shift to blond or very light tones. The result is an immediate sense of mood and intimacy in the ceiling.

**Grain & Appearance:** Plain Sliced Walnut combines straight grain, broad cathedrals, and occasional swirls or figure, which creates layered visual interest. Fine texture and natural luster give panels a distinctly upscale feel, and the variation from sheet to sheet reinforces that it is real wood.
