

White Ash Plain Sliced Veneer

Species Color & Tone: White Ash Plain Sliced Veneer offers light to medium brown tones with a fresh, almost athletic character. Its color sits comfortably between Maple and Oak, which makes it useful when you need one ceiling species to connect multiple wood finishes. Ash accepts stain and clear coats well, so it can shift lighter or darker while staying visually energetic.

Grain & Appearance: Plain Sliced Ash is known for bold, open grain with pronounced cathedrals and ring lines that remain legible at ceiling height. The pattern adds rhythm and texture across larger expanses, suiting active programs like education, retail, recreation, and dynamic workplace interiors.
