

# Solid White Oak Plain Sawn

**Species Color & Tone:** Solid Plain Sawn White Oak offers familiar, soft neutral tones from light gray tan to mid brown, which adapt easily to many palettes. It is highly responsive to stain, from pale washed looks to deeper smoked browns, so one species can support several finish stories in the same project. Natural variation is present but controlled, which keeps large ceilings from feeling busy.

**Grain & Appearance:** Plain sawn cutting reveals classic oak cathedrals and gentle waves, sometimes accented by small ray flecks. The grain adds measured movement and warmth rather than bold figure, making it comfortable in both modern and traditional interiors, especially on wide planks and tile formats.
