

Bringing the Best Together

Exterior Rainscreen Cladding

Aesthetics:

"Helping you create your vision for over 50 years."

- Over 1500 earthen/natural colors produced to-date.
- 5 finishes - smooth, smooth matte, riven smooth, riven matte, honed.
- Through-color panels.
- Color matching and customized finishes.

Performance:

"Durable, stable and low maintenance panels with projects in the field over 50 years."

- Industry leading warranty - 50 years.
- Best-in-class low moisture absorption (0.15% 24 hours submersion)
- Best-in-class impact and flexural strength.
- No picture framing, delamination, or efflorescence.
- Natural and uniform weathering vs blotchy and uneven fading.
- Ideal for high traffic areas.
- Non-porous (easy to remove graffiti/clean).
- NFPA 285, Class A.

Designability & Constructability:

"Much more flexibility on site and in application."

- Easy to cut in the field (durable and no need to seal edges).
- Cantilevered returns (up to 6 inches) - great for window returns.
- Can be used for soffits.
- Radius the panels in the field.
- Can be used at grade.
- High quality factory fabrication available.

Sustainability:

"Environmentally friendly & supports a low carbon footprint."

- Minimum of 70% natural material in each panel.
- Long life span.
- Panels can be upcycled/reused.

Value Upgrade :

VU not VE

- Competitively priced face fixed & concealed options.
- Less damages on site (no need to over order as much material).
- Lighter panels = reduced subframe costs.

32-93x

Less moisture absorption ^[1]

5x

Longer warranty ^[2]

2-3x

Lighter than GRFC/UHPC/Terracotta ^[3]

Color matching available

Install on a radius

No need to seal edges

No delamination
