

Aesthetics:

"helping you create your vision for over 50 years"

- over 60 standard colors (STENI Colour)
- match almost any NCS or RAL
- 3 gloss levels - matt, half-matt, high gloss
- Create your vision with Steni Vision (bespoke printing & pattern capability)

Performance:

"durable, stable, and low maintenance panels with projects in the field over 40 years"

- industry leading warranty - 60 years
- 15 year finish warranty!
- best in class low moisture absorption (0.5% 24 hours submersion)
- best in class impact and flexural strength
- no picture framing, delamination, or efflorescence
- non-porous, so very easy to clean
- NFPA 285, Class A tested

Designability & Constructability:

"much more flexibility on site and in application"

- easy to cut in the field (durable and no need to seal edges)
- can be used for soffits
- radius the panels in the field!!!
- can be used at grade

Sustainability:

"environmentally friendly & supports a low carbon footprint"

- lowest in class manufacturing carbon footprint
- high % natural material
- life span up to 60 years
- panels can be upcycled/reused
- electron-beam cured finish, with no curing solvents involved

Value Upgrade :

VU not VE

- face fixed, cut and delivered (optimal panel size) \$\$\$\$ [1]
- concealed (structural adhesive) (optimal panel size) \$\$\$\$ [2]
- less damages on site (no need to over order as much material)
- lighter panels = reduced subframe costs

up to 40%

Less moisture absorption^[3]
