corpus.e

Corpus-e creates tools for analysis and data harvesting in order to recommend the best-suited products for each consumer through its digital expertise. Sidas and Corpus-e have combined their skills, expertise and knowledge to develop products which are high-performance and adapt to the specific requirements of stores and customers.

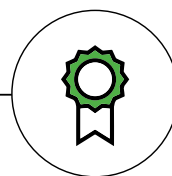

DIGITAL PLATFORM

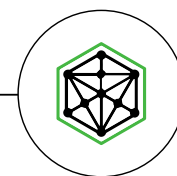

The Academy is born from the last 40 years of experience of Sidas world. Sidas and Podiatech have always trained their clients to be able to deliver the best custom products. The Academy wants to go further and share with you all our experience. Today the academy wants to be more... and share its experience, thanks to its network gathering the best world experts in their fields.

INFORM & EDUCATE

TRAIN & CERTIFY

ANIMATE & CONNECT

THE FIT PROTOCOL IS A UNIQUE PROTOCOL MADE TO SERVE THE END-CONSUMERS; ANSWERING THE NEEDS OF RETAILERS AND INTEGRATING THE BRANDS IN THE PROCESS.

For 40 years, our know-how, our expertise for training and our retailers follow up; help us to create a protocol that guarantees the best experience for consumers, brands and retailers.

A win win win process between consumers, retailers and brands.

- consumers; feel good because they have great fitted shoes
- retailers: follow a specific protocol (for which they have been trained) to welcome a client and make the sale.
- brands: Are glad that retailers sell properly their products, responding to consumer needs.

To be part of the Fit Protocol program:

- Mandatory products
- Mandatory specific trainings
- Special marketing & communication tools
- Special business conditions

A new way to enjoy your sport fully

ANALYSIS

The fondation of a proper fit

ANALYSIS

MEASURING AND ANALYSIS TOOLS

FEETBOX 3D®

The Sidas & Corpus-e solution, a revolutionary new system: FEETBOX® 3D

Our AIM: to give your clients an in-store experience, in order to enhance your business and services. The plate is equipped with a 360° camera that scans your feet and legs up to the knees, in order to obtain a 3D model of them. You can see all the measurements of your feet (length, width, thickness), ankles and calves on the screen. The system makes it possible to simulate the fitting of a customised insole and shoe whilst taking into account the thickness of the sock. After connecting to the database of footwear sold in your shop and a chat with your customer; Feetbox® 3D makes it possible to simulate fitting shoes that are suitable for your customer's feet, in accordance with their constraints, needs and budget. By virtually fitting the shoe on the feet, it also makes it possible to see the different areas where the feet are deformed that need to be considered. An unrivalled experience for the client and it saves you time. Using Feetbox® 3D gives the consumer a unique experience.

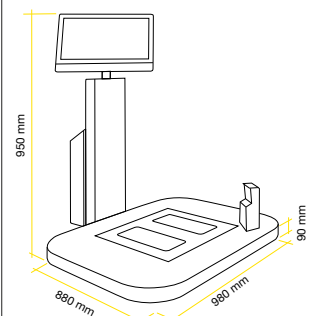

FEETBOX®
3D MOVIE

UNIQUE PROCESS

- Put on a pair of special socks.
- Scans both feet simultaneously up to the knee, in only 20 seconds.
- Analysis and calculation of anatomic data regarding
 - FEET VOLUME
 - FEET PRESSURE
 - LEG ALIGNMENT
 - FUNCTION COMPARED TO THE AVERAGE
- Fitting Tab: visualisation of feet with insoles, socks and shoes.
- Access to a database of the shoes available in shops.
- Virtually try on the shoes recommended by the shop's expert, which are suitable for your feet, your needs and your constraints. See the adjustment as it's made.
- Actually try on the complete solutions proposed by the shop expert to check that the footwear chosen is suitable.

UNIQUE SOFTWARE

2 versions available: SHOOIQ Ski & SHOOIQ Ski BF.

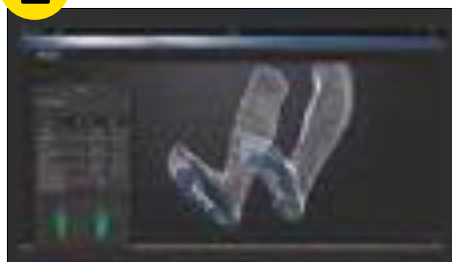

SHOO IQ SKI

1

**REAL DATA BASE
 CENTRALIZATION**
 in a specific file
 for each consumer.

2

**ANALYSE: GIVES ANATOMICAL FOOT
 DATA COVERING**

- foot volumetry;
- foot pressure;
- leg alignment;
- compare to average function.

3

FITTING TAB
 Visualisation of the foot with insoles,
 socks, liners or shells.

SHOO IQ SKI BF

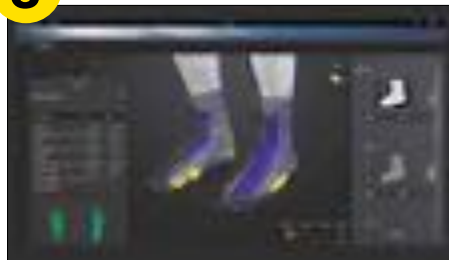

Includes the **SHOOIQ SKI** software (step 1, 2 & 3).

4

SKI BOOTS DATA BASE
 Access to CORPUS-E ski boots data
 base.

5

TRY ON
 Possibility to try on ski boots and
 visualization of the fitting.

6

STOCK
 Possibility to synchronise
 the stock of the shop
 with the software.

ANALYSIS

MEASURING AND ANALYSIS TOOLS

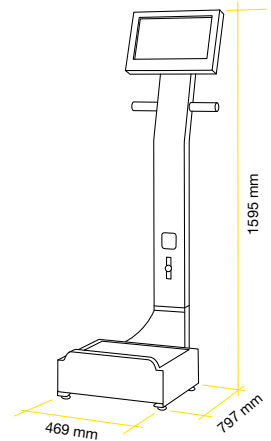

FEETBOX®

Ref. CMAFEETBOX3F-V2

Ref. 313359101

With this tool, your advice will be faster and clearer, and time spent using the Feetbox® creates an excellent opportunity to discuss individual foot problems and expectations with the customer. With just a single analysis, it will allow you to suggest a shoe and justify the suggestion of a suitable 3Feet® insole. Thanks to this exclusive Sidas technology, this analysis can be performed whilst the customer is wearing their socks!

- A sleek design suitable for any shop environment.
- Multi-unit length measurements.
- Efficient indication of foot volume: narrow / standard / wide.
- Quick and easy installation.
- No moving parts: system reliability.
- Wifi connection for online technical support.
- VGA connection for use with an external display.

CONNECT®

Mandatory

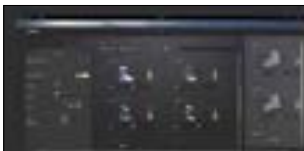

The Connect® option is the solution which will enable you to collect your customers' data (measurements, footprints, types of feet) and enrich your contact database (access to all e-mail addresses and statistics on ShoolQbox's website).

- Screen with contact form at the end of the analysis
- Easy-to-use
- Enhanced, personalised experience for the client

OPTION SHOE SELECTOR

NEW

Thanks to the measurements taken by Feetbox 2D, complemented customer questionnaire, the Shoe Selector allows for an efficient and personally tailored ski boots based on the models pre-selected by the retailer.

MEASURING AND ANALYSIS TOOLS

PODOSCOPE V2

Ref. APODOSIDAS

Ref. 109305101

A podoscope that has a mirror system for viewing the foot print.
Sold with a remote control to facilitate use.

SKIER ANALYSE STATION

Ref. COUCHSKANSTA15

Ref. 38047201

This analysis station offers the technician all the equipment necessary to conduct a fast and effective analysis of the skier's foot in order to facilitate the choice of a shell and recommend a boot-fitting solution. It consists of a double measurer L / XL (choice of shell size and model), a mobile alignment laser (for verifying alignments and recommending the insole) and a boot-spreader for validating the shell volume. The Fit Sticks are not included.

SKI ANALYSE STATION PROCESS

FIT STICKS + LIGHT

Ref. CCHDCFITSTIC

Ref. 32958001

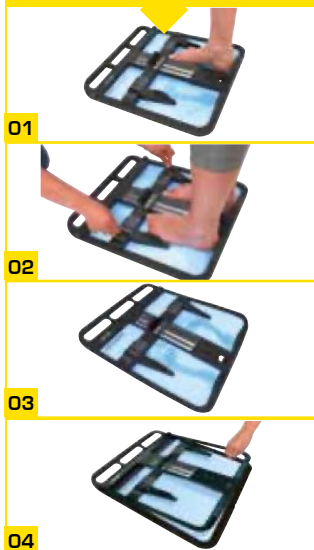

3 sticks of varying thickness (diameter: 10 mm - 15 mm - 20 mm) for measuring the space available in the boot and to confirm the choice of shell size.
Sold as a kit or alone.

WINTER 3D MERINO

Ref. CSE3DWINMERI20

Ref. 319652000

The Winter 3D Merino insole was designed to provide maximum comfort and warmth during winter activities. The insole's anatomical design helps distribute the load underfoot, limiting pressure points. The EVA foam heel absorbs any shocks related to your chosen activity. The merino covering and insulating foil provide warmth and insulation, even during low intensity activities.

1. EVA FOAM: Instant comfort for the entire foot

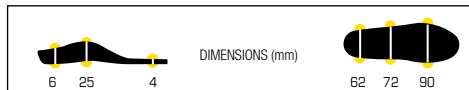

2. MERINO COVERING: Warmth and odour absorption

3. ALUMINUM FOIL: insulation

4. EVA shell: Foot support and stability

5. EVA heel pad: Cushioning

SIZES XS-S-M-L-XL-XXL

NEW

WINTER 3D PERFORMANCE

Ref. CSE3DWINPERF20

Ref. 319651000

Inspired by our developments for world cup skiers, the Winter 3D Performance insole has been designed to improve pressure transmission for the skier and heel stability within the boot. These factors allow the skier to be more precise when carving while also providing improved comfort. The insulating aluminium film and EVA foam provide comfort and warmth for the feet, which is an additional bonus for day-long skiing sessions.

1. TPU shell: Foot support and pressure distribution

2. EVA foam: Comfort

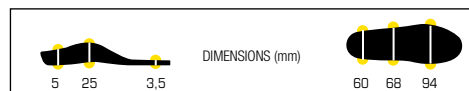

3. Microfibre covering: Comfort and anti-slip

4. Aluminum foil: insulation

5. Heel reinforcements: Forefoot stability

6. EVA heel pad: Shock absorption

SIZES XS-S-M-L-XL-XXL

3Feet®

Feet differ in three main ways; their shape, movement and pressure. Despite these differences, they can generally be grouped into three categories, each with their own distinct needs: High arch feet - Mid arch feet - Low arch feet. The biomechanical construction of the 3Feet® range is therefore adapted to three different types of arches.

CUSTOM XC SKATING

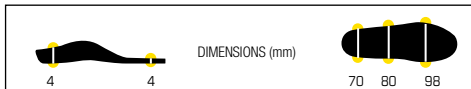

Ref. CSECUXCSKAT17

Ref. 311933000

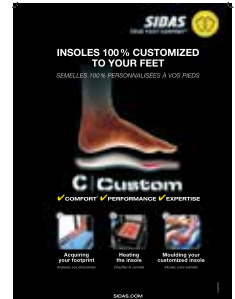

The Custom XC Skating insole is designed to provide skating Nordic skiers an unparalleled experience in terms of comfort, control and power transfer. The AMF top layer makes it easy to put on; the new Jogtene®Light foam provides a boost during all phases of movement and the Podiaflex® base controls twisting, providing an optimal power transfer.

- 1. AMF Top cover: Easy step in & Moisture management
- 2. Jogtene® Light foam: dynamic rebound
- 3. Podiaflex®: Twisting control & optimal power transfer
- 4. Transflux® carbon & Transflux®: Support, stability and support transfer

CUSTOM COMFORT MERINO

Ref. CSECUCOMFME18

Ref. 314134000

The Custom Comfort Merino insole is designed specifically for skier comfort, particularly forefoot comfort, using very soft materials. This fully thermoformable insole perfectly matches the shape of the skier's foot, providing heel stability and underfoot load distribution, ensuring precise control of the skis. Its ideal hybrid covering combines 40% synthetic fibres, guaranteeing strength and durability, with 60% merino wool, which naturally minimises odours and ensures optimal temperature regulation.

- 1. Hybrid merino top cover: Thermoregulation & Absorbs odours
- 2. Podialène foam 2.5 Mm: Cushioning across the entire insole
- 3. Expertene padding: Optimal comfort
- 4. Podiafix® reinforcement: Foot stability & control
- 5. Transflux® reinforcement: Back foot stability
- 6. Podiaflex: Comfort & softness

SIZES XS-S-M-L-XL-XXL

HEAT READY PROCESS

WINTER CUSTOM PRO HEAT READY

Ref. CSECUIWIPROHR19

Ref. 31658700

100% customizable insoles designed for sports of winter (ski, snowboard ...) for an optimal comfort. Stability, precision, performance and prevention of fatigue. Option of heating the sole thanks to Heat Ready technology!

- 1. AMF top cover: soft feeling and easy fitting
- 2. Transflux® reinforcements: foot support & stability
- 3. Podiafix®: Précision
- 4. Podialène foam: cushioned sole

SIZES XS-S-M-L-XL-XXL

HEAT READY PACK 10

Ref. T44-0900-003

Pack of 10 pairs of heating elements (powered by Therm-ic) and 10 pairs of external coatings. Note: the Therm-ic warming elements are only compatible with Therm-ic C-Packs batteries.

CUSTOM STATION

Ref. CMAJUSTAPREMPK15	Ref. 38045201	CUSTOM STATION PREMIUM PACK (FULL EQUIPPED)
Ref. CMAFITSTAPREM15	Ref. 38045501	FIT STATION PREMIUM (WITHOUT EQUIPMENT)

The premium fit station is the must-have Custom moulding station! Its ergonomic, elegant and simple design lets you promote your boot-fitting activity in-store, particularly the Custom technology.

The design ensures both comfort for the boot-fitter and simple moulding. The station is easy to access for both the customer and the technician. It consists of a comfortable adjustable seat and support bars to ensure stability for the customer during the moulding process. A luminous band emphasises the outline of the station and promotes your boot-fitting space.

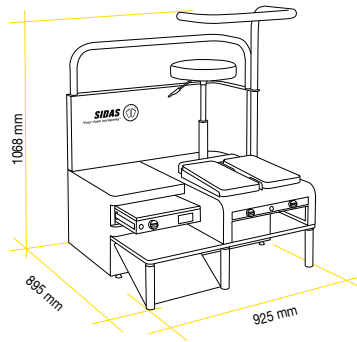

In technical terms, the sophisticated station allows you to analyse feet using the fully-integrated podoscope, to heat using the Moduvac and to make imprints using the directly integrated silicone bags.

5-year guarantee on the equipment.
Lifetime guarantee on metal structure.

HD VAC 2

Ref. 110V: CMAVAHDBLK-1

Ref. 309537101

Ref. 220V: CMAVAHDBLK-2

Ref. 309536101

The best just got better. The HDVAC was already the best Custom system on the market, but the HDVAC2 is the most precise system ever made.

The silicon bags can be stretched up to 800% to adapt to any foot shape, the bags are separated for better hip adaptation, and all the controls are on the front making it easier for the boot-fitter to operate.

For retailers who want to offer a complete professional service, this tailor-made product will enhance your custom business line. If you want to bring the best service to your customer, the HDVAC2 is for you.

The HDVAC 2 is a system for moulding comfort insoles, but cannot replace plantar orthoses fitted by professional foot specialists.

MODUVAC

Ref. 110V: CMAMODU09-1

Ref. 10757601

Ref. 220V: CMAMODU09-2

Ref. 107 57501

The new Sidax system to accompany the HDVAC2 system for moulding Custom footbeds. Compact, fast and simple, the Moduvac heats and presses the footbeds using a vacuum system in order to fuse the materials together, and prepare the insoles for moulding. The Moduvac is compatible with all HDVAC systems.

LASER ALIGNMENT SYSTEM

Ref. CMAVALASER12

Ref. 36010201

Top-quality laser used to check leg alignment. Attaches easily to the Fit Station.

DUAL LASER ALIGNEMENT SYSTEM FOR STATION PREMIUM

Ref. CMAVALASPREMIUM

Ref. 312039101

The dual laser is designed to fit ergonomically on the Premium Fitstation. It enables the technician to check the shin alignment of the customers and speak to them effectively about the benefits of an insole. The dual laser can be adjusted horizontally. It consists of two independent lasers. Works with 2 batteries (supplied).

INNERBOOTS

Experience the ideal fit

INNERBOOTS

PU INNERBOOTS

PU CLASSIC COMFORT

Ref. CCHPUCLACOMF

Ref. 309527000

The PU Classic Comfort boot liner is a premium customization solution for a perfect fit and optimum comfort. The micro fur interior provides softness and warmth and ensures easy foot entry. The new upper cuff structure provides a better torsion-comfort ratio.

Skiers will find this boot liner comfortable and attractive, while boot fitters will find it both safe, and easy to inject.

SIZES C-L

- 1. Pullstraps: Easy foot entry
- 2. Pu carbon structure: Flexibility & design
- 3. Micro fur interior: Softness, warmth & easy foot entry
- 4. Pre-shaped injection pocket: Initial fit & ease of injection
- 5. Laces: Good foot support

Issued with Ready-to-fit tongue

PU CLASSIC RACE

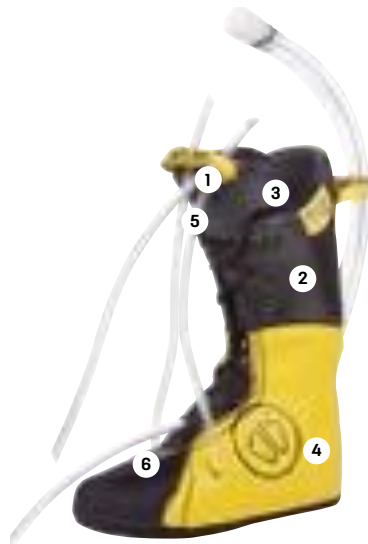

Ref. CCHPUCLARACE

Ref. 311930000

The Classic Race PU innerboot is exclusively designed for narrow ski boots. Uncompromising, it is ideal for skiers looking for ultimate precision. With its fine pocket structure, the innerboot perfectly fits the foot and the shell after injection. Every detail is meticulously thought out to avoid hard spots. Fitted with an injectable tongue (by PU gun), the innerboot guarantees optimal and personalised shin comfort.

SIZES C - L

- 1. Pullstraps: Easy foot entry
- 2. Pu carbon structure: Flexibility & design
- 3. Textile interior: Precision & easy foot entry
- 4. Thin injection pocket: Precise injection
- 5. Strap holding
- 6. Injected tongue

Issued with PU foam tongue

PU TRANSFOAM FLEX

Ref. CCHPUTRAFLEX

Ref. 307886

This 'Flex' material has the same properties as Transfoam but offers more flexibility, stretchability and comfort. For technical skiers looking for a simpler injection process and a tolerant liner that doesn't affect shell rigidity. Transfoam technology features sealed bags that reduce leakage.

PU CLASSIC FLEX W

Ref. CCHPUCLAFLW15

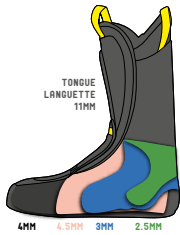

Ref. 380462

The Classic Flex Women boot liner, developed for the needs of female skiers, combines comfort and precision. The form and the materials used (e.g. micro-fur) ensure softness, flexibility, elasticity and overall comfort. The design of these boot liners is ideal for the Sidas shells created especially for female skiers.

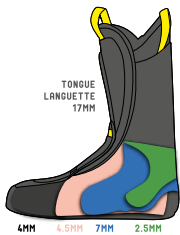

THERMOFORMABLE INNERBOOTS

Issued with Ready-to-fit tongue slim

Issued with Ready-to-fit tongue

CENTRAL REMOVABLE TONGUE SLIM (CRT SLIM)

Ref. CCHCFTHERCRTSL19

Ref. 31643100

The finest thermoformable liner.

100% thermoformable, this liner is designed for alpine or touring ski boots with a low fitting volume. Designed with the same technology as the CRT, it is distinguished by its finesse and lightness.

The removable flap is thermoformable and can also be replaced by an injectable Sidas flap or a Heat Ready heated flap.

SIZES: D-K

1. Merry mesh lining: Comfort, lightness, low thickness
2. Collar joint: High flexibility, follows the rolling out of the foot as you walk
3. 3 lateral EVA thicknesses: Precision and comfort + heel support
4. Thin removable flap: For maximum precision

CENTRAL REMOVABLE TONGUE (CRT)

Ref. CCHCFTHERCRT18

Ref. 314194000

100% thermoformable, this liner is designed for alpine skiing and cross-country skiing.

The result of 2 years of development with the best bootfitters, its internal structure, with variable thicknesses, guarantees comfort and precision after moulding.

The removable flap is thermoformable and can also be replaced by an injectable Sidas flap or a Heat ready heated flap

SIZES D - K

1. Micro-fur upper lining: Maximum comfort
2. Merry mesh lower lining: For greater precision
3. Upper cuff opening: Flexibility
4. 3 EVA side width: Precision and comfort & heel support
5. Removable tongue: For optimal precision

CENTRAL HIGH V3

Ref. CCHCFCENTHIV3

Ref. 380460

Fully thermoformable. Provides maximum comfort and precision. Designed for alpine skiing and ski touring (high boots with 4 buckles).

With its internal design in black micro-fur the boot liner offers skiers softness and comfort.

CENTRAL WOMEN

Ref. CCHCFCENTW15

Ref. 380461

This fully thermoformable boot liner is designed for female skiers requiring comfort and warmth. This boot liner is also available in the warming version.

Pack of 10.

INNERBOOTS TONGUES

TONGUE HEAT READY powered by Therm-ic

Ref. CCHDCLARTFHR19

Ref. 316588000

Adjustable heated flap made using Therm-ic technology. Designed for skiers who suffer from cold feet who want to combine comfort and technology with a 100% customised heated liner. Invisible heating element integrated into the front of the liner ensuring optimal warmth for the foot. Works with C-pack Therm-ic batteries (sold separately)

READY-TO-FIT TONGUE SLIM

Ref. CCHDCLARTFSL19

Ref. 316589000

The fine and adjustable liner is designed for alpine or touring ski boots with a low fitting volume. Its design offers greater precision and adapts perfectly to the foot.

READY-TO-FIT TONGUE V2

Ref. CCHDCLARTFV2

Ref. 372492

A ready-to-fit tongue V2, with a highly curved shape to fit snugly against the foot and enable maximum transmission power, and a unique design to provide a perfect progressive flex.

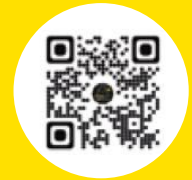

PU FOAM TONGUE

Ref. CCHACFTONG17

Ref. 312025000

The adaptable tongue is very curved to fit perfectly to the foot and allow maximum power of transmission. Its unique design provides flexion perfect progressive.

KIT DEFORM TWIN

Ref. COUCHKIT75TWIN

Ref. 319792101

Experience shows that more than 75% of the reshaping done by bootfitters are due to localised foot pain.

This Kit Deform Twin is the basic kit for stores wishing to start a boot-fitting operation and to offer a quick and efficient service to their customers.

TOOLS	CHARACTERISTICS	ADVANTAGES	BENEFITS
1 CROCO TWIN	<ul style="list-style-type: none"> - 10mm steel structure - 45° curvature - Deformation measuring system - Removable tool support heads 	Shell reshaping tool that allows the bootfitter to access all parts of the shoes and also to measure the size of the reshaping carried out. Its symmetrical construction allows a single tool to be used for the best results for both right and left shoes.	<ul style="list-style-type: none"> - The precision of the alignment of the tool under Stress is guaranteed - Allows for precise reshaping of the forward parts of the foot (M1 and M5) - The reshaping work is carried out with precision - Makes it possible to work on the right and left areas with a single tool - Easy and effortless reshaping
2 VARIABLE ARCH	<ul style="list-style-type: none"> - Double shaft - Plates on ball joint - 190 mm serif 	<ul style="list-style-type: none"> - Possibility to have 2 push axis - Provides support on differently shaped surfaces - Big space between the push axis and the support surface 	<ul style="list-style-type: none"> - Allows very extensive forefoot deformations - Provides a stable and homogeneous support - Avoids damaging the shell during deformation
3 STRETCHING RING	<ul style="list-style-type: none"> - Diam: 137 mm 	<ul style="list-style-type: none"> - Large support far from push axis 	<ul style="list-style-type: none"> - Doesn't mark the shell
4 METAL CONNECTORS	<ul style="list-style-type: none"> - Aluminium structure - Mounted with screw 	<ul style="list-style-type: none"> - Maintains the heat - Easy to mount and dismount 	<ul style="list-style-type: none"> - Give an inside heating of the deformation zone, creating a more precise and quick deformation - Time gain when changing the tips, and keep the rotation of the tips

KIT DEFORM 75 +

Ref. COUCHKIT75P

Ref. 37251301

This kit is designed to complement the Deform 75 kit. It is used for localised shaping of wider boot shells. Used together with the Deform 75 kit, it provides an enhanced solution to customers' localised foot pain problems.

- 1** WOOD MET 1
- 2** WOOD MET 2
- 3** EXTENSION 28 + SYMETRIC CONNECTOR

KIT DEFORM YETI

Ref. COUCHKIT75P

Ref. 37251401

Used and approved by boot fitters for more than 10 years, the Yeti and Yeti+ kits have now been combined to create the Deform Yeti kit.

It is suitable for all generalised boot shaping requirements. Designed to complement the Deform 75 and Deform 75+ kits, it is suitable for all boot shell-shaping requirements.

**BOOTFITTING SERVICE**

Ref. CMALBBFSERV15

Ref. 38046701

The Bootfitting Service is a working and storage unit that allows you to promote the boot-fitting service in your store. It consists of a work table, a drawer, a storage space for the oven and a space to display messages about your store and boot-fitting service.

The Bootfitting Service is for use with Sidas tools such as the Kit Deform 75 or the Kit Deform Yeti.

Unit only - tools to be ordered separately.

Overall dimensions: 86 x 63 cm

Working surface dimensions: 75 x 54 cm

BOOT ACCESSORIES

Enhance your bootwear

SIZE ADJUSTMENT

- Check the length of your ski boot in mm.
- Adjust the ski boot traction device to the corresponding size (round down). The tip of the arrow indicates the size selected.
- Screw in with a Phillips screwdriver.

FITTING THE DEVICE ON THE SHOE

- Strap on the ski boot traction, starting from the front of the boot, then pull back to adjust it on the heel.
- This product should be stored in a dry place, away from heat and UV sources. It is recommended to check the product every year.

SKI BOOTS TRACTION

Ski boot traction devices allow you to walk confidently and comfortably with your ski boots. Their tapered shape at the tip makes the movement of the foot easier and their asymmetric crampon design makes walking on snow safer.

ASYMMETRIC CONSTRUCTION

WALK TRACTION

GRIP SNOW AND ICE

- Anatomically constructed to facilitate the forward flexing movement of each foot (right and left).
- End studs for superior grip.
- Wider stud base for long-lasting hold.
- Thick, hard-wearing rubber, as used in the motor industry, for a better hold on the foot.
- Shaped at the heel for a better fit.
- Stainless steel stud tips.
- Textured interior webbing for improved grip onto footwear.
- PPE (Personal Protection Equipment)-certified by the CTC.
- Each pair comes with two spare studs.

POWER STRAP

Ref. Powerstrap men*
CCHACBOOSIDM15
309520101

The Sidas Booster™ Strap is an essential accessory for improving ski boot performance.

When used correctly, it ensures excellent control of the skis, improves comfort and helps prevent shin pain. It eliminates empty space between the shin and the ski boot tongue.

*Not to be sold in North America (USA and Canada)

The Sidas Booster™ Straps are supplied with 4 screws and 4 grip inserts.

BAGS

BOOT BAG **BLUE- NYLON**

Ref. ASACSKIBAGBL17

Ref. 111792101

Ski boot bag made of soft nylon, allowing easy insertion of the boots.

Dimensions: 40 x 42.5 X 24 cm

Composition: 600 d coated polyester and nylon

Reinforcements: 4 plastic reinforcements on the underside + moisture-wicking

BOOT BAG **BLACK**

Ref. ASACSKIBOOTBK15

Ref. 38046901

The Boot Bag Black is an ultra-light, water and dirt-resistant boot bag, reinforced to protect the contents.

The bag opens at the top to allow easier access to gear. The side pocket offers practical storage. The shoulder strap has been reinforced for added comfort when carrying.

The bag is easy to carry thanks to its shoulder strap that can be adjusted to each different person.

Dimensions: 40 x 42.5 X 24 cm

Composition: 600 d coated polyester and nylon

BOOT BAG **MOUNTAIN**

Ref. ASACSKIBAGMOUNT17

Ref. 111899101

The Mountain Boot Bag is a lightweight and sturdy ski boot bag. Its coated fabric is water-resistant and dirt-resistant; its numerous reinforcements protect the contents of the bag and increase its durability. Its central opening allows easier access to the equipment.

Dimensions: 40 x 42.5 X 24 cm

Composition: 600 d coated polyester and nylon

Reinforcements: 4 plastic reinforcements on the underside + moisture-wicking

MEASURING THE FOOT

SIZES

A size is a series of measurements, expressed in points, that characterise a foot, last or shoe.

There are different size systems, each with its own history and logic: The Paris Point (EUR), the American Point (US) and the English Point (UK).

The Mondopoint (MP) system, resulting from work carried out by more than 18 countries and governed by international standard ISO 9407, has been created to harmonise the scales.

STEP 1

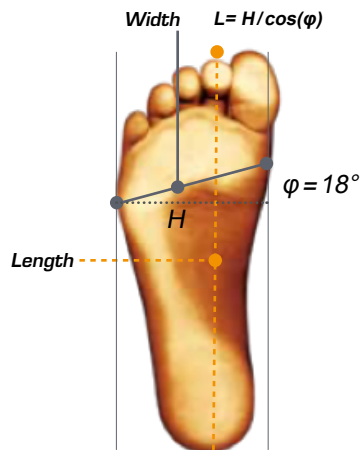

Measurement of the length and width of the foot

1
Analysis of the foot length

2
Analysis of the foot width

Foot Sizer

STEP 2

Pressure analysis

Analysis of the foot pressure
