SIDAS WORLD

SIDAS: A PARTNER FOR EVERYONE WHO WANTS TO GIVE THEIR FEET THE COMFORT AND PROTECTION THEY NEED FOR EACH NEW SPORT AND EACH NEW DAY.

The success of Sidas' various projects is achieved by combining our passion for sport with the expertise of athletes, orthopaedic centres and sports experts.

Sidas offers a wide range of products: insoles, foot protections, shoes, ski liners, socks, thermal socks, insoles and accessories.

Podiatech offers a full range of equipment and consumables for podiatry and foot care, in order to meet the needs of foot care professionals and their patients.

A new way to enjoy your sport fully

THE FIT PROTOCOL IS A UNIQUE PROTOCOL MADE TO SERVE THE END-CONSUMERS; ANSWERING THE NEEDS OF RETAILERS AND INTEGRATING THE BRANDS IN THE PROCESS.

For 40 years, our know-how, our expertise for training and our retailers follow up; help us to create a protocol that guarantees the best experience for consumers, brands and retailers.

A win win win process between consumers, retailers and brands.

- Consumers; feel good because they have great fitted shoes.
- Retailers: follow a specific proven protocol to improve thier running business through KPI (Key Performance Indicators).
- Brands: can count on the retailer to sell their products correctly, responding to consumer needs.

To be part of the Fit Protocol program:

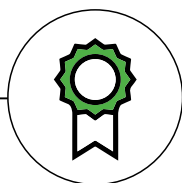

- Mandatory products
- Mandatory specific trainings
- Special marketing & communication tools
- Special business conditions

MEASURING AND ANALYSIS TOOLS

FEETBOX®

CMAFEETBOXSID-V2

318539101

With this tool, your advice will be faster and clearer, and time spent using the Feetbox® creates an excellent opportunity to discuss individual foot problems and expectations with the customer. With just a single analysis, it will allow you to suggest a shoe and justify the suggestion of a suitable 3Feet® insole. Thanks to this exclusive Sidas technology, this analysis can be performed whilst the customer is wearing their socks!

- A sleek design suitable for any shop environment.
- Multi-scale sizes.
- Efficient indication of foot volume: narrow / standard / wide.
- 18 languages available and configurable, including 3 in live access.
- Quick and easy installation.
- No moving parts: system reliability.
- WiFi connection allowing for online technical support (connection optional).
- Software updates – the kiosk is upgradeable and connected for updates.
- HDMI connection for an external display.

CONNECT®

Mandatory

The Connect® option is the solution which will enable you to collect your customers' data (measurements, footprints, types of feet) and enrich your contact database (access to all e-mail addresses and statistics on ShoolQbox's website).

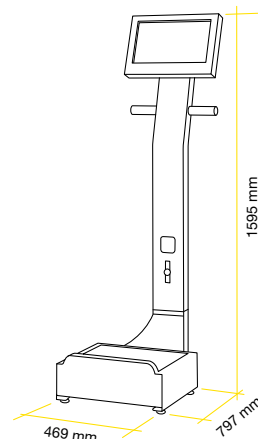

- Screen with contact form at the end of the analysis
- Easy-to-use
- Enhanced, personalised experience for the client

OPTION SHOE SELECTOR

Thanks to the measurements taken by Feetbox 2D, complemented by the optional DSS and a customer questionnaire, the Shoe Selector allows for an efficient and personally tailored running shoe based on the models pre-selected by the retailer.

Wait 8 to 12 seconds for calculation.

4
Foot measurement: Length, width, type
of foot and shin alignment.

5
Optimal and dynamic analysis of
the footprint. See the foot print on
screen.

OPTION **DYNAMIC STRIKE SENSOR (DSS)**

NEW

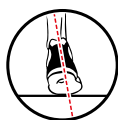

CMAFEETDSSSENSDY 318329101

4D GAIT ANALYSIS: DYNAMIC AND TEMPORAL

Using gyroscopes, motion sensors, and the ability to capture over 24 hours of running, DSS sensors can record all parameters of foot movement in 3 dimensions, as well as speed and acceleration, at high regularity during a run.

The interpretation of this data is carried out based on scientific and statistical methods. This makes it possible to characterise the runner's gait throughout their run as well as the development of their gait over time; using far more than just a few seconds' worth of information.

CSEESIMREDDF19

315500000

IMPACT REDUCER DUAL FOAM

These insoles provide high levels of impact dissipation and foot propulsion. The Dual-Material construction provides cushioning at the heel and propulsion at the forefoot. The slim design (3mm) allows them to be used both underneath existing insoles, or in direct contact with the foot. They are also effective in preventing joint pain.

SIZES: XS-S-M-L-XL-XXL

DIMENSIONS (mm)

1. Merrymesh topcover: Comfort
2. Rearfoot section (viscolatex): Absorbs shocks
3. Forefoot section (rubber foam): Boosts propulsion.

3D SENSE

CSE3DRUNSENS19

315498000

RUN 3D SENSE

Take back control of your sensations with the 3D Sense insole. Designed for regular running, this insole ensures a natural stride that is as close to the ground as possible. Its anatomical shape stimulates a maximum number of touch sensors for greater reactivity. Its structure combines dynamism and lightness to support the foot's natural movement.

SIZES: XS-S-M-L-XL-XXL

DIMENSIONS (mm)

- 1/ **Merrymesh topcover:** Non-slip
- 2/ **Dual-density structure:** Vertical comfort
- 3/ **Midfoot structure (EVA 60):** Supports the foot's natural movement
- 4/ **Forefoot structure (EVA rubber):** Boosts propulsion
- 5/ **Heel Pad (EVA):** Absorbs shocks
- 6/ **Perforation:** Breathability

3D PROTECT

CSE3DRUNPROT19

315495000

RUN 3D PROTECT

An anatomical 3D insole designed for runners seeking maximum comfort and protection with each stride! The gel at the heel provides exceptional cushioning and the front pad boosts forefoot propulsion. Its anatomical reinforcement guarantees stability and stride control for safe running.

SIZES: XS-S-M-L-XL-XXL

DIMENSIONS (mm)

- 1/ **Merrymesh topcover:** Non-slip
- 2/ **EVA structure:** Vertical comfort
- 3/ **Midfoot reinforcement (TPU):** Stabilises and controls the stride
- 4/ **Forefoot structure (EVA rubber):** Boosts propulsion
- 5/ **Wide gel pad:** Dissipates impact
- 6/ **Perforation:** Breathability

CUSTOM BIKE PRO

Fully customisable insoles developed in partnership with the ASTANA cycling team. These insoles have been designed to offer cyclists a unique experience by improving performance through reduced susceptibility to fatigue, and increased comfort and precision. Their construction helps to stabilise the heel, keep the midfoot in place and distribute load, optimising the power transfer from foot to pedal. The forefoot technology significantly reduces vibration and protects joints from microtrauma. Antibacterial, resistant insoles suitable for narrow shoes.

SIZES: XS-S-M-L-XL-XXL

DIMENSIONS (mm)

1. **AMF topcover:** Good moisture management, antibacterial & durable
2. **Expertene foam:** Optimum comfort, reduced vibration & extremely resistant
3. **Podiaflex:** Foot support & control
4. **Transflux reinforcements:** Support & stability for the rearfoot, encouraging correct body alignment

FOOT PRODUCTS

Discover the Sidas Foot Products range, with a wide array of products for use before, during, and after sport. Comprising In-Shoe Pads, Foot Protection, Creams, and Foot Orthoses, all of your needs are met, and all activities are catered for.

IN-SHOE PADS

Sidas is launching In-Shoe Pads, a new range of gel products that provide a solution to everyday foot pain. These products can be slipped into your shoe to relieve the most frequent types of pain, such as heel pain, blisters, flat feet, etc.

CFCFPHEELSTR18

313346101

GEL HEEL STRIPS

These anti-slip heel strips prevent your feet from moving around inside your footwear. Used preventively, they will stop swelling, chafing and blisters.

ONE SIZE

Fitting: Position the gel anti-slip heel strips inside your footwear where the heel is located.

Pack par per
Supplied in box of 10

CFCFPMETPAD18

313332000

FOAM MET PADS

These foam met pads relieve tension in the forefoot, ensuring optimum comfort.

SIZES: S (36-39) ; M (40-43) ; L (44-47)

Fitting: Remove the insole from your footwear and place the met pad in the centre of the insole towards the front

Pack par per
Supplied in box of 10

CFCFPARCHSUP18

313331000

GEL ARCH SUPPORTS

These gel arch supports support your feet all day long. Specially shaped to fit the arch of the foot, they remain stable and invisible in your footwear, whatever activity you are doing.

SIZES: S (36-39) ; M (40-43) ; L (44-47)

Fitting: Insert the arch supports into your footwear where the arch of your foot is positioned. Clean your arch supports regularly with soap and water to ensure they remain in place.

Pack par per
Supplied in box of 10

CFCFPHEELPAD18

313333000

GEL HEEL PADS

These gel heel pads absorb shocks all day long for optimum comfort. They are easy to fit and will quickly become an essential part of your daily life.

SIZES: S/M (36-41) ; L/XL (42-46)

Fitting: Insert the heel cups into the back of your footwear. Clean your heel cups regularly with soap and water to ensure they remain in place.

CREAMS

Sidas is embarking on a new adventure by marketing a range of sports creams. This range is intended for Outdoor sports such as running, hiking or trail running and uses top-of-the-range natural ingredients. It consists of two products, an anti-chafing cream and a recovery gel with a cooling effect.

CFCCREANTIF17_75ML

311063101

ANTI FRICTION CREAM 75 ML

ANTIFRICTION CREAM 15 ML CFCCREANTIF17_15ML / 311064101

Anti-friction cream that prevents blisters. Protects, moisturises and revitalises. This cream has a protecting action, forming a film that boosts the skin's elasticity and defensive ability. Apply before sport by rubbing it in at length to areas prone to friction: feet, thighs, arm pits, nipples, etc.

75 ML : pack of 15 or individually

15 ML : pack of 25

COMPOSITION

Shea butter, marine collagen, vitamin E, witch hazel extracts.
Does not contain parabens or PEG. Contains natural preservatives.
Not tested on animals.

99% natural ingredients

CFCCRERECOV17_75ML

311066101

RECOVERY CRYO GEL 75 ML

RECOVERY CRYO GEL 15 ML CFCCRERECOV17_15ML / 311065101

Provides rapid relief from injury: strained muscles, impact injuries, cramp, dislocations and bruising. The silicon and targeted essential oils act in synergy to produce a three-fold effect: relaxing, stress-relieving and repairing.

Apply locally as soon as possible after injury. Repeat application if necessary.

75 ML : pack of 15 or individually

15 ML : pack of 25

COMPOSITION

Organic silicon and essential oils (mint, peppermint, eucalyptus, rosemary, tea tree)

77% natural ingredients

CFCFOCAREKIT20

318293000

FOOTCARE KIT V2

This foot-care kit protects and soothes your feet during sport from start to finish. It prevents blisters and friction, soothes impact in your shoes, avoids black nails and friction between the toes.

SIZES: S/M (36-40) / L/XL (41-47)

1 Anti Friction cream 15 ml / 1 Recovery gel 15 ml
2 Gel toe caps / 4 Gel toe wraps / 5 foot protectors v2

MARKETING TOOLS

Range box that can also be used as a display. Supplied in box of 10.

FOOT ORTHOSES

The Foot Orthoses range is designed to provide comfort and support for your feet, ankles, and joints. These products are great for prevention and recovery, limiting the risk of injury while practising sports.

CFCFPHEELHUG18

315271101

HEEL HUG

Offer your heel more cushioning and comfort! The Heel Hug exerts lateral compression on the heel, renewing its natural cushioning properties. Choose your preferred level of compression from the three options.

You can use it as you see fit: before, during or after exercise, for a minimum of one hour. This product offers improved comfort; it is not a medical orthosis.

STRONG COMPRESSION

MID COMPRESSION

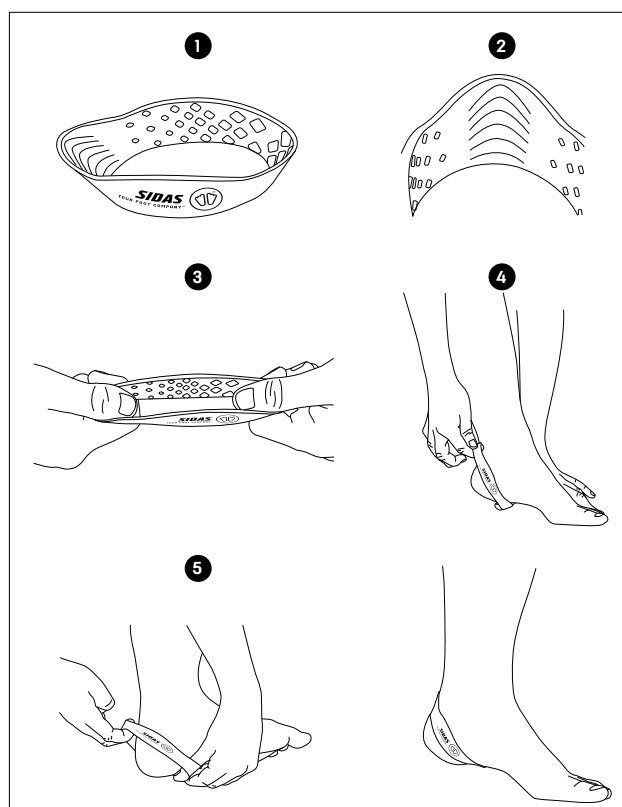

LOW COMPRESSION

PLACEMENT

Choose your preferred compression from Heel Hug's three options

- 1 The drawings of the small diamonds must be on the inside of the Heel Hug; this is the part that will be in contact with skin.
- 2 Identify the end where you can see the small lines. This end will be placed at the ankle and therefore indicates the direction in which to slip on the product.
- 3 Place two fingers at each end and stretch the Heel Hug
- 4 You can now slip the Heel Hug around your ankle. To benefit from its compression effects without feeling too restricted, it is important to carefully adjust the Heel Hug's position; it should not be too high.
- 5 Once you have slipped on the first Heel Hug, take a few steps and you can immediately feel its effect.

ANALYSIS

The fondation of a proper fit

MEASURING AND ANALYSIS TOOLS

FEETBOX 3D®

The Sidas & Corpus-e solution, a revolutionary new system: FEETBOX® 3D

Our **AIM**: to give your clients a new in-store experience, in order to enhance your business and services. The plate is equipped with a 360° camera that scans your feet and legs up to the knees, in order to obtain a 3D model of them. You can see all the measurements of your feet (length, width, thickness), ankles and calves on the screen. The system makes it possible to simulate the fitting of a customised insole and shoe whilst taking into account the thickness of the sock. After connecting to the database of footwear sold in your shop and a chat with your customer; Feetbox® 3D makes it possible to simulate fitting shoes that are suitable for your customer's feet, in accordance with their constraints, needs and budget. By virtually fitting the shoe on the feet, it also makes it possible to see the different areas where the feet are deformed that need to be considered. An unrivalled experience for the client and it saves you time. Using Feetbox® 3D gives the consumer a unique experience.

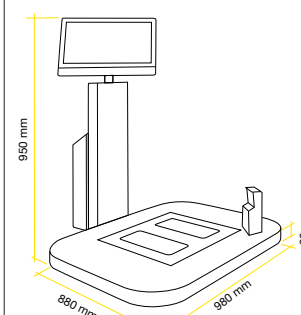

**FEETBOX®
3D MOVIE**

UNIQUE PROCESS

- Put on a pair of special socks.
- Scans both feet simultaneously up to the knee, in only 20 seconds.
- Analysis and calculation of anatomic data regarding
 - FEET VOLUME
 - FEET PRESSURE
 - LEG ALIGNMENT
 - FUNCTION COMPARED TO THE AVERAGE
- Fitting Tab: visualisation of feet with insoles, socks and shoes.
- Access to a database of the shoes available in shops.
- Virtually try on the shoes recommended by the shop's expert, which are suitable for your feet, your needs and your constraints. See the adjustment as it's made.
- Actually try on the complete solutions proposed by the shop expert to check that the footwear chosen is suitable.

MEASURING AND ANALYSIS TOOLS

FEETBOX®

CMAFEETBOXSID-V2

318539101

With this tool, your advice will be faster and clearer, and time spent using the Feetbox® creates an excellent opportunity to discuss individual foot problems and expectations with the customer. With just a single analysis, it will allow you to suggest a shoe and justify the suggestion of a suitable 3Feet® insole. Thanks to this exclusive Sidas technology, this analysis can be performed whilst the customer is wearing their socks!

- A sleek design suitable for any shop environment.
- Multi-scale sizes.
- Efficient indication of foot volume: narrow / standard / wide.
- 18 languages available and configurable, including 3 in live access.
- Quick and easy installation.
- No moving parts: system reliability.
- WiFi connection allowing for online technical support (connection optional).
- Software updates – the kiosk is upgradeable and connected for updates.
- HDMI connection for an external display.

CONNECT®

Mandatory

The Connect® option is the solution which will enable you to collect your customers' data (measurements, footprints, types of feet) and enrich your contact database (access to all e-mail addresses and statistics on ShoolQbox's website).

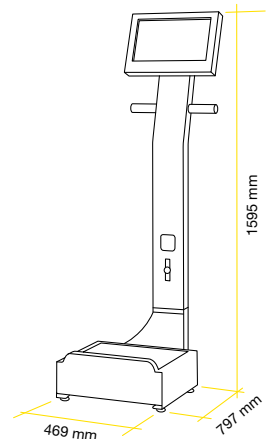

- Screen with contact form at the end of the analysis
- Easy-to-use
- Enhanced, personalised experience for the client

OPTION SHOE SELECTOR

Thanks to the measurements taken by Feetbox 2D, complemented by the optional DSS and a customer questionnaire, the Shoe Selector allows for an efficient and personally tailored running shoe based on the models pre-selected by the retailer.

NEW

CMAFEETDSSSENSDY 318329101

4D GAIT ANALYSIS: DYNAMIC AND TEMPORAL

Using gyroscopes, motion sensors, and the ability to capture over 24 hours of running, DSS sensors can record all parameters of foot movement in 3 dimensions, as well as speed and acceleration, at high regularity during a run.

The interpretation of this data is carried out based on scientific and statistical methods. This makes it possible to characterise the runner's gait throughout their run as well as the development of their gait over time; using far more than just a few seconds' worth of information.

PRESS-CAM V5.0

AMPRESSCAM5-0

110775101

Presscam V5 is a hybrid platform that combines pressure and posturology, compliant with Directive 93/42/EEC and certified by DEKRA. It is equipped with a next-generation software for sharper images (100 colour levels instead of 20) and video coupling with the option to take videos and synchronise them with footprint acquisitions (angle measurements and alignment verification). It is powered via a USB cable connected to the computer.

Seven main criteria can be viewed:

- Clinical examination report with statistical processing,
- Static plantar pressure,
- Dynamic plantar pressure and comparison (scan at 100 Hz, higher than most platforms that scan at 40 Hz),
- Displacement of pressure centres (P.C.) over a given time (at 40 Hz),
- Multi-footstep acquisition,
- LAMFI read-out,
- Comparative heel-forefoot analysis.

Sold with a remote control and « Podo remote » application (on Android) to start/stop remote acquisitions.

Dimensions (largeur/longueur) : 550 x 661 mm

Active surface area : 400 x 400 mm

Base : 9 mm-thick

Weight : 3 kg

PODOSCOPE V2

APODOSIDAS

109305101

The premium fit station is the must-have Custom moulding station! Its ergonomic, elegant and simple design lets you promote your boot-fitting activity in-store, particularly the Custom technology.

The design ensures both comfort for the boot-fitter and simple moulding. The station is easy to access for both the customer and the technician. It consists of a comfortable adjustable seat and support bars to ensure stability for the customer during the moulding process. A luminous band emphasises the outline of the station and promotes your boot-fitting space.

In technical terms, the sophisticated station allows you to analyse feet using the fully-integrated podoscope, to heat using the Moduvac and to make imprints using the directly integrated silicone bags.

5-year guarantee on the equipment.

Lifetime guarantee on metal structure.

CUSTOM PROCESS

HD VAC 2

110V: CMAVAHDBLK-1 309537101

220V: CMAVAHDBLK-2 309536101

The best just got better. The HDVAC was already the best Custom system on the market, but the HDVAC2 is the most precise system ever made.

The silicon bags can be stretched up to 800% to adapt to any foot shape, the bags are separated for better hip adaptation, and all the controls are on the front making it easier for the boot-fitter to operate.

For retailers who want to offer a complete professional service, this tailor-made product will enhance your custom business line. If you want to bring the best service to your customer, the HDVAC2 is for you.

The HDVAC 2 is a system for moulding comfort insoles, but cannot replace plantar orthoses fitted by professional foot specialists.

MODUVAC

110V: CMAMODU09-1 10757601

220V: CMAMODU09-2 107 57501

The new Sidas system to accompany the HDVAC2 system for moulding Custom footbeds. Compact, fast and simple, the Moduvac heats and presses the footbeds using a vacuum system in order to fuse the materials together, and prepare the insoles for moulding.

The Moduvac is compatible with all HDVAC systems.

LASER ALIGNMENT SYSTEM

CMAVALASER12 36010201

Top-quality laser used to check leg alignment. Attaches easily to the Fit Station.

DUAL LASER ALIGNEMENT SYSTEM FOR STATION PREMIUM

CMAVALSPREMIUM 312039101

The dual laser is designed to fit ergonomically on the Premium Fitstation. It enables the technician to check the shin alignment of the customers and speak to them effectively about the benefits of an insole.

The dual laser can be adjusted horizontally.

It consists of two independent lasers.

Works with 2 batteries (supplied).

MEASURING THE FOOT

SIZES

A size is a series of measurements, expressed in points, that characterise a foot, last or shoe.

There are different size systems, each with its own history and logic: The Paris Point (EUR), the American Point (US) and the English Point (UK).

The Mondopoint (MP) system, resulting from work carried out by more than 18 countries and governed by international standard ISO 9407, has been created to harmonise the scales.

STEP 1

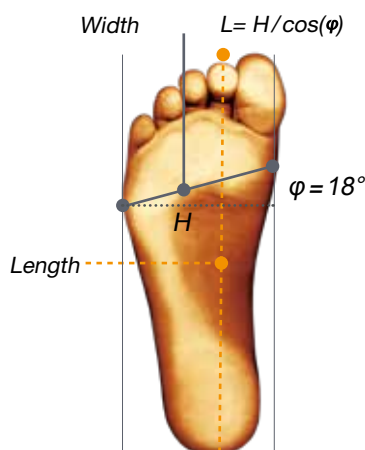

Measurement of the length and width of the foot

1
Analysis of the foot length

2
Analysis of the foot width

STEP 2

Pressure analysis

Analysis of the foot pressure

1

2

3

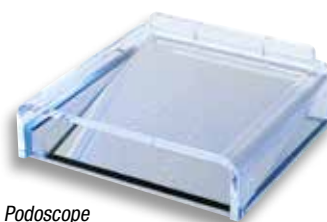

Feet Revelator™

1. Two pressure points
2. Anatomical pressure
3. Uniform pressure

ETAPE 3

Step 3: analysis of volume and shape

Analysis of the volume and shape of the foot

1. High-arched foot
2. Medium-arched foot
3. Low-arched foot
