

CAPABILITIES STATEMENT

ITM Group delivers specialized logistics, supply chain management, and consulting solutions for federal sectors, consistently delivering transformative, industry-leading solutions. Founded in 2006, ITM Group began by specializing in cold-chain freight forwarding. This foundational experience fostered deep expertise in identifying supply chain challenges and drove innovation. Since expanding into the federal sector in 2012, ITM Group has applied its innovative approach across government markets.

CORE COMPETENCIES

Supply Chain & Global Trade

Comprehensive supply chain optimization using analytics, technology, and 3PL services, coupled with licensed NVOCC/OTI international trade facilitation for control over customs, documentation, and flexible cargo handling (secure/general).

Facility Operations & Logistics Support

Providing comprehensive site support including warehouse management, shipping/receiving operations, and skilled staff augmentation to ensure seamless integration and operational continuity.

Procurement & Project Management

Delivering tailored procurement and strategic sourcing solutions focused on value and compliance, alongside experienced, agile project management for efficient execution of complex commercial and government initiatives.

Data Management & Technology Solutions

Implementing efficient inventory control and secure data/records lifecycle management (storage to certified destruction). Developing and managing secure logistics technology solutions, including data systems and blockchain applications, to enhance visibility, performance, and business intelligence.

Administrative Support

Providing skilled administrative support services, such as data entry and customer service, while leveraging current software and best practices to enhance efficiency and streamline daily operational workflows for our clients.

KEY DIFFERENTIATORS

Small Business Expertise

ITM Group possesses proven expertise in managing small business set-asides and navigating complex federal subcontracting requirements. We structure compliant solutions that maximize market opportunities, delivering significant value to partners and clients.

Innovative Business Model

Our efficient virtual operating model minimizes overhead, enabling highly competitive pricing. This structure enhances operational agility and offers clients potential cost savings of up to 30% compared to traditional competitors.

Industry Experience

With almost 20 years of company experience and 30+ years of collective team expertise in logistics and supply chain management, ITM Group effectively addresses complex industry challenges. Our services span strategic analysis, system design, optimization, and execution.

Efficiency and Productivity

ITM Group utilizes Lean Six Sigma methodologies to drive process efficiency, reduce waste, and enhance productivity. This commitment applies to both our internal operations and the optimization of client service delivery, ensuring effective logistics and supply chain solutions.
