ABOUT OUR COMPANY

Founded in 2006 by Mr. Isahm Diab, ITM Group started as a modest freight forwarding company, specializing in managing cold-chains for U.S. exporters. This early experience provided the team with deep insights into global supply chain inefficiencies and sparked a drive for innovation. By 2012, ITM Group expanded its reach to collaborate with the federal government, bringing fresh, forward-thinking ideas to both commercial and federal supply chain sectors. Despite initial challenges in navigating the federal landscape, ITM Group's resilience and adaptability, coupled with strategic partnerships and innovative solutions, have fueled its growth and solidified its role as a key provider of logistics, supply chain management, and consulting services. Committed to excellence, ITM Group continues to deliver transformative, industry-leading solutions to its clients.

DIFFERENTIATORS

Small Business Expertise: ITM Group stands out for its adept management of small business set-asides and its ability to meet intricate federal subcontracting requirements. We excel in creating scenarios that not only comply with regulations but also maximize market opportunities, providing substantial value to both our partners and clients.

Innovative Business Model: Our distinctive virtual corporate structure allows us to operate with lower overhead costs, enhancing our operational efficiency. This setup enables us to offer our services at competitive prices, with potential cost savings of up to 30% for our clients. This approach not only sets us apart from competitors but also underscores our commitment to innovation and adaptability in a dynamic market.

Industry Expertise: With a solid track record spanning over 13 years in the logistics and supply chain sector, coupled with our team's collective experience of over 30 years, ITM Group is well-prepared to tackle the complexities of the industry. Our comprehensive range of services covers everything from strategic analysis and system design to optimization and execution, positioning us as the go-to experts in our field.

Efficiency and Productivity: At ITM Group, we are staunch advocates for process efficiency, actively employing Lean Six Sigma methodologies to enhance our internal operations and client services. This commitment to continuous improvement helps us eliminate waste and boost productivity, further solidifying our role as a leader in efficient logistics and supply chain solutions.
