

The Ultimate Eco-Tote Packing Checklist

Step 1: The "Heavy" Rule

- Always put your heaviest items (books, canned goods, small appliances) at the **bottom** of the tote.
 - **Pro Tip:** Don't fill a whole tote with books! Fill it halfway with books and the rest with pillows or towels to keep it easy to carry.

Step 2: Use "Softs" as Padding

- Save money on bubble wrap. Use your socks, scarves, and t-shirts to wrap fragile items like mugs or glass frames before nesting them in the tote.

Step 3: The "Level-Off" Method

- Ensure your items don't stick out over the top edge. Our totes are designed to stack perfectly, but only if the interlocking lids can snap shut flat.

Step 4: Label by Room

- Use a piece of painter's tape or our provided labels on the flat **side** of the tote (not the top). This way, you can see where the tote goes even when they are stacked five high!

Step 5: The "Essentials" Tote

- Pack one tote with everything you need for your first night: toiletries, chargers, a change of clothes, basic tools, and maybe

the coffee maker.
