

Truth and Lies

The Misconstruction of
UC Socially Dead
Sophia Berry

Misconstruction:

UC San Diego has been struck with the title “UC Socially Dead” as it stems from its strong focus on STEM and research, which some interpret as meaning students are too busy or introverted to be social. But how much of this is actually true? And how much of this idea has been misconstrued?

The Reality:

While it might not have the same party culture or Greek life as other schools, there is still a thriving social scene including those activities, but also with other activities such as niche clubs, cultural organizations, etc. You may just have to put yourself out there a little bit more than others.
