Struggling with depression?

Why SPRAVATO®

If you've taken two or more oral antidepressants and still experience symptoms of depression, you might have treatment-resistant depression (TRD).

It might be time to talk to your doctor about a different treatment approach. See what makes SPRAVATO® different and learn more about other patients' experiences with SPRAVATO®.

You will take SPRAVATO® nasal spray yourself, under the supervision of a healthcare provider in a healthcare setting. Your healthcare provider will show you how to use the SPRAVATO® nasal spray device.

During and after each use of the SPRAVATO® nasal spray device, you will be checked by a healthcare provider who will decide when you are ready to leave the healthcare setting.
