Dear Ms. Dennis and the ASAP Team:

FBI New Orleans would like to thank Ms. Jill Dennis and the ASAP Team for past and continued support in investigative matters.

On March 28, 2023, Ms. Jill Dennis presented the capabilities of ASAP ankle monitoring to law enforcement partners at the New Orleans Police Department's standing weekly violent crime meeting. FBI New Orleans Violent Crime Task Force recognized the tool could serve as an asset in fulfilling their mission and pursued access.

ASAP has provided responses to location data requests in a timely and accurate manner, paying dividends for our field office and for the citizens of Louisiana. Since April 2023, the FBI New Orleans Violent Crime Task Force has directly used ASAP's capabilities to locate and arrest subjects of six warrants in partnership with state and local law enforcement partners:

- On April 17, 2023, FBI New Orleans assisted Lafayette Police Department regarding an investigation involving Matthew Allen. Lafayette Police Department later booked Allen for Accessory to Second Degree Murder.
- On April 21, 2023, FBI New Orleans assisted Jefferson Parish Sheriff's Office and the United States Marshals Service in arresting Larry Lamont Junior in New Orleans for Second Degree Murder.
- On April 24, 2023, FBI New Orleans assisted Jefferson Parish Sheriff's Office by arresting Jenaj Johnson in Chalmette for Accessory to Second Degree Murder.
- On July 26, 2023, FBI New Orleans arrested Cyril Hoffman in New Orleans on federal narcotic and firearm violations.
- On July 12, 2023, FBI New Orleans assisted Louisiana State Police by arresting Larry Lewis in New Orleans on four counts of first degree murder.
- On August 21, 2023, FBI New Orleans arrested Kent Anderson in New Orleans on federal narcotic and firearm violations.

FBI New Orleans is grateful to Ms. Dennis for imparting her knowledge to the task force, granting our personnel access to ASAP via established accounts, and the timely response to our requests.

Sincerely Yours,

Douglas A. Williams, Jr.
