EMAP

MONITOR - ENFORCE - PROTECT

EMAP STAKEHOLDER ONE-PAGER

EMAP for Government & Oversight

One connected accountability record across jurisdictions, providers, devices, and stakeholder roles.

THE CHALLENGE

Electronic monitoring crosses courts, providers, jails, prosecutors, law enforcement, bonding companies, victim services, and other authorized stakeholders. When those records remain disconnected, meaningful oversight becomes difficult and leaders may lack a consistent way to determine whether required processes were documented and carried through.

WHAT EMAP CAN HELP YOU DO

- Provide authorized oversight visibility across jurisdictions and monitoring providers
- Create consistent, time-stamped records across the monitoring lifecycle
- Show who documented or performed an action and when it occurred
- Support review of whether applicable laws, court orders, policies, and required procedures were addressed
- Standardize accountability across providers and device manufacturers without favoring one vendor
- Identify documentation gaps, unresolved handoffs, and areas needing additional review

WHY IT MATTERS

EMAP connects electronic-monitoring activity into a common accountability record so authorized oversight can determine who knew what, when they knew it, what action followed, and whether required processes were documented and carried through. That creates a foundation for consistent multi-jurisdiction or statewide review without depending on one provider or device manufacturer.
