LIKO-S was founded in 1992 and is a family owned and operated company. It currently ranks among the leading European companies in its field.

We have offices in the Czech and Slovak Republic, Hungary and export partners in 12 European countries. We are all connected by a common vision: To be a leader in our field, providing customers with the best service. In negotiations with our trading partners we operate as a serious, fair and solid company, we always try to fulfill the true meaning of these words. The high demands that we place on ourselves create the opportunities for further growth and development. LIKO-S employs experienced professionals and talented young people who gain experience in projects at home and abroad. For development we work with top companies from the Netherlands, Denmark, Belgium, Switzerland, Germany, Austria, Canada and the USA. **All products are tested according to European norms in accredited testing institutes, including the environmental requirements of LEED.**

**ENERGY**

The Energy Division focuses on energy savings. We build new buildings and insulate already existing structures. Energy uses the experience we gained under the Living Buildings® and Smartisol® insulation program.

**PRODUCTION**

The Production Division manufactures technological lines and their parts from carbon and stainless steel and aluminum. Our products are included in the supply of technology units throughout Europe. 70 employees work in the Production Division.

**INTERIORS**

The Interiors Division manufactures and installs removable and sliding partitions as well as inhall units. We are one of the world leaders in this field.
