INNOVATIVE LEADERS

Our aim is to be the market leader in our industry and to offer our customers the highest quality services.

"We are convinced that by adhering to this strategy and meeting the strictest requirements, we will create new sources of growth and development. Our work is our passion and we enjoy it. We value high-quality work and reward our workers accordingly."

Ing. Libor Musil
Chairman of the Board of Directors

LIKO-GLASS®
DESIGN GLASS

Laminated glass that brings uniqueness and a distinctive style to any interior. Not only can natural or artificial materials be inserted between the glass panes, but also LED or LCD technology.

SILENTPET®
ACOUSTIC PANELS

SilentPET® stylish acoustic panels made from PET bottles and textile fibres. They can be shaped as required and excel due to their acoustic values.

RAVA®
FRAMED PARTITIONS

The partition's load-bearing structure is completely hidden, while the negative joint enables the partition's lining to stand out.

PDLC
DIGITAL BLINDS

Be seen or have some privacy. With a single touch, you can change the clear wall into frosted opalescent glass and vice versa.

MICRA II
FRAMELESS PARTITIONS

Double-glazed partitions which provide more privacy while maintaining transparency.

MICRA I
FRAMELESS PARTITIONS

Simple glazed partitions that combine transparency and flexibility.

VACUWALL®
MOVABLE WALLS

The only movable wall in the world that will give your premises unlimited flexibility. The unique vacuum system ensures that installation is a question of just a few minutes.

SMART-i-WALL®
INTERACTIVE PARTITIONS

A revolutionary solution which easily transforms a glass partition into a multimedia touch screen.

OMEGA
FRAMED PARTITIONS

Traditional partition design, which enables a combination of full and glass modules.

LIKO-SPACE®
MOVABLE WALLS

With the vacuum system, the effective division of work space is now even easier. We are the only manufacturer of this system.

WE ARE BUILDING A **HAPPY** AND **GREEN** COMPANY

The spirit of innovation drives us forward. We are always inventing and innovating – we were the first in Europe to begin manufacturing interior partitions and instigated the foam insulation market. In short, we are trendsetters.

It was only personal progress and technological development that enabled us to come up with the SMART-i-WALL® interactive partition. The multimedia partition of the future can do anything you can think of.

Welding in Austerlitz

ENERGY

Builds administrative, logistical and production facilities for business. Specialises in corporate headquarters for medium-sized and small businesses. Insulates facilities with the revolutionary method from Canada - spray-on heat insulation system*.

PRODUCTION

Specialises in a wide range of materials such as steel, stainless steel, heat-resistant materials and aluminium. Production of precision metal parts - from conceptual design to final surface treatment. We export more than 90% of this division's production.

INTERIORS

We supply prefabricated systems for the creation of interior spaces in buildings - adjustable and movable partitions, inhall units*, acoustic ceilings, LIKO-Glass® laminated glass and SMART-i-WALL® interactive partitions. These systems are developed and manufactured by ourselves.
