Call #2 - Notes

<u>Agenda:</u>
- Calendars
    - Please have your S'ganit submit them to Dani if they have not already!
    - If you do not have a S'ganit (or one that is planning on making a calendar), please let me know, we can make things work.
- Board Management: How's it going? What can I do to support you?
    - Please make sure you guys are being active in both your board and chapter group chats, this will make it much easier for you guys to have active participation when it comes to events and calls.
    - Do you have an advisor/one that you are comfortable with?
        - If no, and we haven't gotten on a 1:1 to discuss it, let me know.
    - Make sure that programming isn't the only thing going on within your board and in your chapter. There still needs to be active recruitment and posts on social media. Let's keep our members engaged!
    - Reach out for more support on these things.
- Convention!
    - Coordinator apps are out, steering apps drop next week!
    - If you're not sure whether you want to coordinate or not, just look through the [application](), and ask questions.
        - No pressure to submit the application if you decide that this isn't something you want to do.
- The importance of Action Items
    - Action Items let me know that you are actually paying attention to what I am sending out, and give me information that I need to know.
    - No action items for this, but I still do not have September action items from many of you (from the video releases)!
    - Please do them!
- You guys rock! I know things are super stressful with chapters and school right now, but we will get through it. Please let me know what I can do to support you.
