

BIOMEDICAL EQUIPMENT TECHNICIAN

ACADEMY OF HTM

“Training that works!”

TRAINING THAT WORKS! ✓

Welcome to Academy of Healthcare Technology Management (AHTM)!

You have chosen an exciting, rewarding career with great opportunity and life-long rewards. The medical field continues to grow and the job market for Healthcare Technology Management/Biomedical Equipment Technicians (HTM/BMET) is very strong.

Around the world, the medical industry is constantly growing, just look at all the new hospitals being built, not to mention all the new medical clinics, doctor's offices, and urgent care centers.

You have chosen the perfect time to train for your new career!

Our **Instructional Staff** has over a decade of online training, they were the first to bring HTM/BMET training online; They all have 20 plus experience in Healthcare Technologies (HTM/BMET & Clinical). Our Instructors actively work in the career field. AHTM's staff will work closely with our students, and will facilitate any training you may receive from employer training sites.

AHTM's Small class sizes allow for more individual time and assessment, as well as flexibility in scheduling. We believe in **small class sizes** to allow for more individual time and assessment.

Ready for a JOB ? If you do not have a job lined up in the industry we will assist you before you start during your enrolled and participation in the program, and after you graduate. Our goal is to work with you to make it happen. We can assist with resume development, interview techniques, job leads, and contacts to potential employers.

PROGRAM DESCRIPTION

Healthcare Technology Management Diploma Program

At AHTM we offer the most up-to-date overview of the ever-changing career of Healthcare Technology Management. Our online format gives the student flexibility to complete a program of study when the traditional classroom setting is not an option. AHTM provides a classroom like environment by utilizing the latest Electronic Textbooks and Interactive Software available, in unison with video webinars where students may interact with instructors and fellow students. Our diverse career training program will not only focus on the technical skills required to be a HTM/BMET, but also on management, organizational, logistics, compliance, research, and other related skills vital to Healthcare Technology Management.

The certificate program has been designed to offer the student theoretical and practical knowledge required by the Healthcare Technology Management industry. The program promotes an academic, technical and human formation with emphasis in the development of management and leadership skills. Students undergo training in electrical and mechanical systems, networking, logistics, as well as being introduced to clinical applications and hospital operations. This program includes instruction in calibration, installation, safety testing, preventative maintenance on numerous modalities of medical equipment. AHTM will assist students with Externship (hands-on training) as needed.

AHTM strives to prepare you for a job in Healthcare Technologies. As the industry grows, you can count on AHTM being there to help you keep up to date with Continued Education, Cooperative Education Training, Online Courses and more.

PROGRAM OUTLINE

AHTM offers an online learning program which prepares the student to become an entry-level Biomedical Equipment Technician (BMET).

COURSES:

- Anatomy & Medical Terminology - (4 weeks/3 semester credit hours)
- Networking A+ or Network + - (4 weeks/3 semester credit hours)
- Biomedical Equipment I- (4 weeks/3 semester credit hours)
- Healthcare Technology Management - (4 weeks/3 semester credit hours)
- Biomedical Equipment II- (4 weeks/3 semester credit hours)
- Healthcare Technology Management II (4 weeks/3 semester credit hours)

Total Hours: 15 Credit Hours

Length of Program: 25 Weeks (Online Instruction*)

Optional Courses:

- *Electronics (4 weeks/3 semester credit hours)*
- *Externship/Hands-on Training (80-160 clock hours, check availability)*

Courses are offered in 4-week modules, two courses at a time. Students will complete lessons in each course weekly; this includes videos, interactive learning modules, power point presentations, reading material, textbook assignments, quizzes, etc. The weekly lessons are self-paced and does not require the student to be logged on at certain times or days. Weekly requirements must be completed by Sunday at midnight, unless otherwise approved by the instructor. Each course will have a final exam to complete online. The instructor will determine if tests are timed or not.

ADMISSIONS REQUIREMENTS

All candidates for admission must be at least 17 years of age.

Admissions staff will communicate with each prospective student prior to enrollment. During this interview, the Admissions Representative will fully explain the policies and procedures of the school, all aspects of the training programs the individual is interested in, as well as job placement assistance procedures and results. The prospective student will be given options for payment of tuition. It is AHTM policy that only the most interested, ambitious, and motivated students will be enrolled into our programs.

Credit for Previous Training, Education or Experience!

Previous education and/or training applicable to a particular training program may qualify for credit, reducing the program length and tuition accordingly. Students requesting credit for previous training or experience are required to provide the school with official transcripts, IT certifications, and/or employer affidavits to evaluate and verify the student's skill level.

Ready to get started? Classes start monthly!

Email your enrollment counselor for the admissions and enrollment applications. Once we receive the application, online assessment, a copy of your transcript(s)/diploma and the down payment, you will pick your start date. Then, via email, you receive the online log-in instructions and be assigned the new student orientation course. You will also be introduced to your instructor and program director. After the new student orientation process is complete, you will begin your first course!
