Designed and Manufactured in INDIA

USER MANUAL

Revision : AP.01.007

WARNING

- Keep the Packaging Box intact for future use related to return replacement or carrying it
- Keep Away from small children to play with , in or around the pet feeder.
- Avoid using Autopet Feeder with pets not able to reach the food tr ay.
- Position the device firmly and do not immerse the base part in water at any time , water damage voids the warranty.
- Do not use pet feeder with any other material expect standard pet foods
- Use it Outdoor with control environment and plug the electric plug to unreachable position
- Not to be used with wet, canned or moist food.
- disassembling the unit will **void the warranty support**
- C Series can be used with Food Kibble not more than 7MM circular size and 13MM in case of D series
- Only use attachments recommended or sold by the manufacturer.
- Contact us in case of malfunction don't repair by your own.
- Always unplug when not in use and before cleaning.
- Do not pull on the electrical power cord to remove the plug from the wall outlet.
- If the plug of this device gets wet, turn on electricity to that wall outlet. Do not attempt to unplug.
- Examine the feeder after installation. And programmed it before filling it up with the Food.
- To avoid tripping , always position power cord out of the way of foot traffic.

CLEANING

It's recommended to clean the feeder regularly for the health of your pet with dry or Semi moist cloth , Bottom feeder assembly should not be cleaned using water which may damage the device, and clean it with electric plug removed.

ASSEMBING THE CONTAINERS

· you can tilt the Bottom assembly to remove all the food outside the box.
. Assembling contained plug is from 1side first and than press from other side.
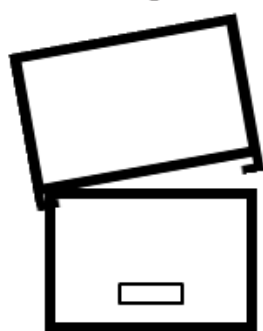

Step:1 – Tilt the 1st container and hook on of the side first
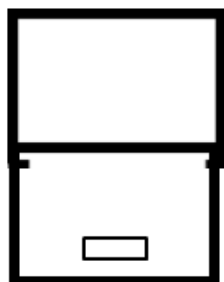

Step:2 – Then Press the other side
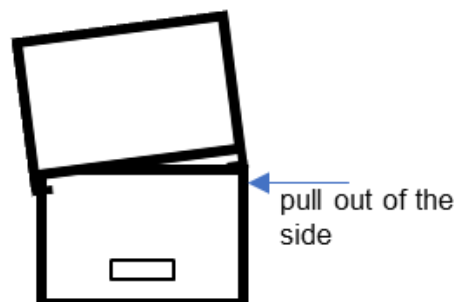

pull out of the side

Disassembly – Gently pull out of the side and than the other

Warranty

Control Buttons

Dispense Window

Tray - 100 Grams or 250 Grams

Important :

Quantity control :-

1. Autopet uses food Quantity Dispense control is based on dispense duration , based on the food type and its size turn on feeder and gauge the required quantity to dispense and stop , not down the time taken to dispense that much quantity and set the timer accordingly. E.g.: if your dog or cat need one feeding to be 100 grams and time taken to dispense your size food is 02.21.Mins. you should set the Meal Start time – 10:00 AM and Meal Stop Time : 10:02 or 10:03.

2. You can use any food tray make sure its closed to the dispense window.

3. For device with DC adapter, don't use any adapter other than required rating contact us for info.

4. iPhone on iOS 9.0 or later; smartphone on Android 5 or later Wireless router 2.4GH z {802.11 b/g/nl for Wifi Autopet Remote Feeder For more information, please visit www.autopet.in
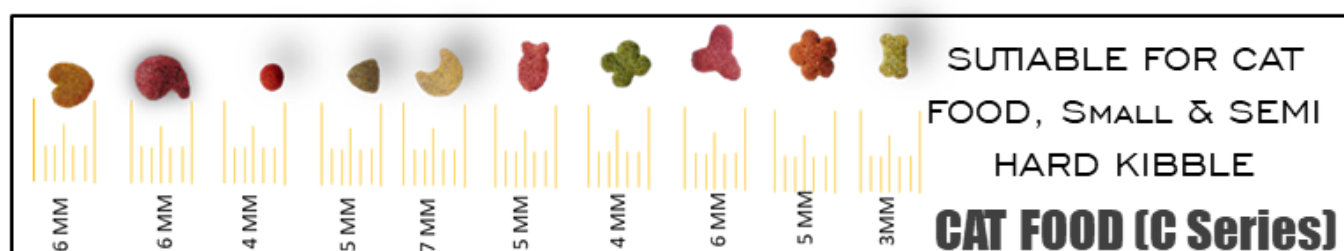

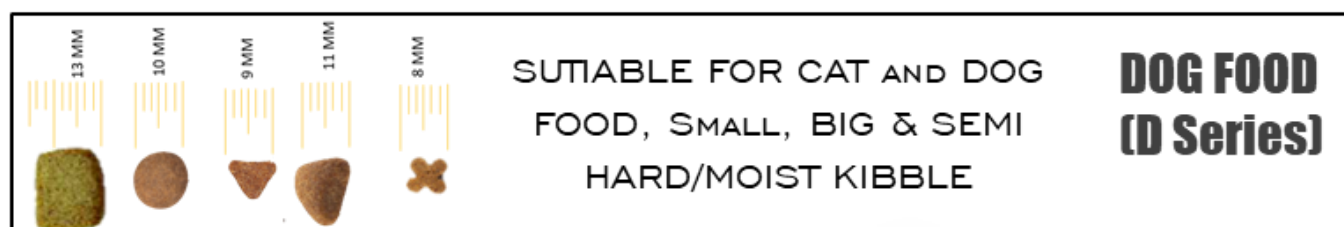

What's in the box

1 x Automatic Pet Feeder (middle and Top extender as per the selected variant) 1 x Power Adapter/ Wire
1 x User Guide   1X 100 GRMS or 250GRMS plate

Autopet WiFi Unit

The autopet WIFI Automatic Feeder connects to your home's wireless router and allows you to program and monitor your pet's meals from anywhere. right from your smartphone with the Smart Life app. Use the app to schedule your pet's meal times. Smartphone alerts let you know when your pet has been fed for added peace of mind . Delivering a convenient lifestyle to you and helping your pets become their best, the AUTOPET WIFI Remote Feeder keeps you connected to your pet's feeding routine wherever you are.

Autopet Smart & Advanced Unit Works

The autopet smart & advanced feeder is wireless control to your autopet using any mobile or laptop once connected to autopet, just open chrome browser and visit the IP, quick simple and fast . Once the meal time is set configure the device n auto mode and its done. Proprietary inhouse technology to keep the control simple, affordable

SUTIABLE FOR CAT AND DOG FOOD, Small, BIG & SEMI HARD/MOIST KIBBLE

DOG FOOD (D Series)

SUTIABLE FOR CAT FOOD, Small & SEMI HARD KIBBLE

CAT FOOD (C Series)

Problem	Solution
Food volume not same each time	Time = Quantity , you can expected +/-5% volume mismatch, we suggest to dispense manually 3-4 time and average time taken to dispense the same volume to be use to set ON & OFF time
Unable to Connect with Wifi Feeder use mobile app	Incorrect account and password format - 5G not supported - Please use 2.4G wireless (Jio or airtel broadband user) set network to 2.4GHZ not on auto mode.) Application problem - Some program conflicts may happen. Please restart your mobile
Feeder appears disconnected from WIFI.	Please check that the distance between your feeder and router is no more than 12m / 33ft. and no concrete walls or too many obstacles between them. Otherwise the WIFI network can be weak and cause unstable connection.
Start & Advance feeder, unable – connected to autopet network but on iOS and mac it doesn't load	iOS & mac have higher security network protocol- use Hotspot method mentioned in the setting page

INSTALLATION MANUAL:SMART TIMER SETTING

It needs one time installation, Dedicate 1-2 Hrs. for proper installation with Drip ports

- autopet Timer setting
- autopet Drip line installation.
- Maintenance Tips
