

OASIS CAPITAL SOLUTIONS LLC

Real Estate Made Simple

## RESIDENT HANDBOOK\*

This tenant handbook provides important information about your new home and answers frequently asked questions. As you get settled into your new home, please be sure to login to your resident portal at <https://app.propertyware.com/pw/portals/oasiscapitalsolutionsllc/tenant.action> and update your profile and payment information.

**Please remember to have all the utilities put in your name (where applicable) effective the first day of your lease.**

**\*This handbook is meant as a guide ONLY and does not change, or supersede "the" lease agreement.**

### RESIDENT GUIDELINE

-----

#### PAYING RENT

Rent is due on the day your lease started each month, and may be mailed, delivered to our office, paid through our online portal or at Walmarts with your RentMoney voucher.

Make checks payable to:

OASIS CAPITAL SOLUTIONS LLC

SEND TO: 1511 Prosperity Farms Rd. #400, Lake Park, FL 33403

**Rent may be paid by personal check, money order, cashier's check or with cash using a RentMoney voucher at Walmart. All major credit cards and ACH accepted through online portal.**

**Remember that late charges are assessed on the 6th day of your due date. See your lease for late fee rules.**

If not using the portal for payments, please put your name and rental address on your check/money order *every time* to ensure that you are properly credited with the payment. Be sure checks/money orders are completed with names of payer & payee.

Rent mailed to us should be delivered with enough time to be received and processed by us within 5 days of the due date. We highly recommend to pay ONLINE to avoid late fees.

## **MAINTENANCE EMERGENCY # 855.802.6409**

If a maintenance issue should arise, you may complete a maintenance request through your resident portal. When filling out the online service request form be sure to provide the following:

- Be specific about the problem and remember to include your name, address and the best number to reach you.
- Permission to enter your home. Please submit a time when you will be available to let a vendor or repair person into the property. If you select the "Anytime" option, the management office will enter your unit in your absence.
- Tenants are responsible for securing any pets that the vendor may encounter on their visit to the property.

## **CARE & USE INFORMATION**

The following information has been gathered in response to requests from residents looking for guidelines at move-in and move-out times. If you have questions about the use and care for items not on this list, please call us. Most of our properties have care manuals for appliances, etc., provided by the owners. Please refer to them first whenever there is a problem. Answers are often found in these guides.

## **PLEASE REPORT UNSAFE OR HAZARDOUS SITUATIONS IMMEDIATELY.**

### **FURNACE AND WALL HEATER MAINTENANCE**

All tenants are responsible for cleaning or replacing the furnace filter at least once a year, preferably at the beginning of the fall or winter. Problems caused by failure to clean/replace the filter may be the tenant's responsibility. To care for your furnace and wall heaters please do the following: (OCS LLC) provides a monthly ac filter.

- Dust can accumulate at furnace vents as well as at fan vents. A small broom brushed across the vent openings will clear away any dust and help the furnace or fan operate efficiently.

### **GAS WALL HEATERS**

If your home has a gas wall heater, it is prudent to turn off the gas at the unit when the heater is not needed. On any gas appliance, new or older, if the pilot light goes out you may detect a gas odor, which should dissipate in a few minutes after airing out the room. If the odor persists call the utilities company immediately.

## **POWER, FURNACE & HOT WATER HEATER OUTAGES**

If the power goes out in your unit or house, first check to see if the whole area is without power. If it is out in the area, chances are the utilities company already knows about it. You can, however, try calling them to report the problem.

If the power is only out in your house/unit, check the circuit breaker box. One or more circuits may be tripped and you may see the switches in the off position. If no switch is **off** turn each switch **off** then **on** to reset the circuits. If this doesn't solve the problem, call the utilities company.

If either your furnace or water heater is not working, **call the utilities company first** to have them check it out and/or relight the pilot. If there are additional problems, they will inform you as to what needs to be repaired. Call OCS LLC with the information they provide you.

## **DRAINS**

**Please avoid letting food, hair, and excess soap get down the drains.**

Clogged drains caused by hair, grease and soap are the tenant's responsibility. Some dishwashers will clog from food left on the dishes when put in the machine. An excellent drain cleaning/clearing solution recipe is:

- 1 cup salt
- 1 cup baking soda
- 1 cup vinegar
- Followed by 8 cups boiling water.

We recommend performing this treatment monthly to avoid build-up. Hardware stores carry "hair catchers" to place in sink and tub drains that significantly help keep drains free of hair.

## **GARBAGE DISPOSALS**

**Be sure to always run water while the disposal is operating to avoid damage to the unit.** Let the water run long enough to grind all the material in the disposal. Then let the water run for 10-15 seconds after turning off the disposal. Learn to recognize the sound the machine makes when completely free of garbage.

Disposals are designed to grind up **organic items only**. Exceptions include: banana peels, artichoke leaves, celery stalks, flower stems, coffee grounds, bones, or any item that is particularly tough. **Never put paper, plastic, glass, aluminum foil or grease in the disposal.**

Always be sure to check the power switch (usually under the sink), try the reset button (somewhere on the machine), and remove all contents before calling for maintenance. **Problems with the garbage disposal are the tenant's responsibility.**

## **REFRIGERATOR COILS / DRIP PANS**

Keep coils on refrigerators (especially sub-zeros) free of dust. Coils need free air flowing around them to operate efficiently. **Failure to keep coils clean may cause the appliance motor to burn out.** The replacement of a burned out motor due to dirty coils may be the tenant's responsibility. Some refrigerators have drip pans under them. If not kept clean, the pans can start to develop a strong odor. Please take the time to get acquainted with the appliances in your unit.

## **FIREPLACES**

Please burn only hardwoods in the fireplaces and woodstoves to minimize to buildup of creosote, etc. in the chimney. Creosote build-up is a fire hazard. Be sure a fireplace screen is in place when a fire is burning to prevent hot ashes from burning the floor or floor coverings.

## **OVEN RACKS AND PANS**

The easiest way to clean oven racks and pans is to put them in a heavy duty garbage bag (do this outdoors), add 2 cups of ammonia and seal the bag. Let it sit for a couple of hours, then carefully open the bag (without inhaling the strong odor). Remove racks & pans and the grease will wipe off with very little effort.

## **PLUMBING FIXTURES**

**Never use abrasives on brass or gold fixtures.** It is best to wipe fixtures clean after each use. If brass needs to be polished, please use a product specifically designed for use on brass. Many homes and apartments have low-flow toilets. We strongly recommend that you keep a plunger nearby. Low-flow toilets tend to clog or back up if too much paper, etc. is flushed. **Tenants must be prepared to plunge the toilet to clear clogs and avoid damage from over-flows.**

## **WATER DAMAGE**

Tenants must take care to avoid water damage caused by allowing water to sit on counters and floors. Care must be taken to ensure that shower curtains are inside the tub, and that shower doors are completely closed when taking a shower. Water on tile floors can seep through the grout and cause dry rot on the floorboards below. Water can also seep around the edges of linoleum and damage the flooring below. We recommend putting a mat, towel or rug on the floor to step on when exiting the tub or shower. Water can easily be splashed into the space behind the faucet in the kitchen or bath and damage the counter surface. Please be sure to keep these areas dry to prevent damage.

## **SLIDING GLASS DOORS, SCREEN DOORS AND SHOWER TRACKS**

It is imperative that dirt and debris regularly be cleaned out of sliding door tracks. Rolling over dirt, leaves and pine needles that frequently accumulate in the tracks can damage the wheels on sliding doors, especially the heavy glass sliders. Please make it part of your cleaning routine to clear the tracks. Please do not use oil or WD40 to lubricate slider doors or screens. They only attract dirt and gum up the wheel mechanisms. In order to retard the growth of mold in the tracks and at the bottom of shower doors, keep the tracks clean. Use an old toothbrush and do a regular monthly cleaning, it's much easier than doing one major cleaning at move-out time!

## **MOLD**

Bleach is the best product for removing mold that forms around the edges of showers, tubs, on tile walls, around metal windows, and anywhere there is moisture. The easiest way to remove mold is to cut paper towels in half and fold them into one-inch strips. Dip each strip into the bleach bottle and hold your finger against it as you draw it out. Lay the bleach-soaked strips directly on the mold and leave them there for several hours. It works like magic. Remember to use rubber gloves, and air out affected rooms.

## **HOUSE PLANTS**

Be sure drip pans are kept under all plants. Water run-off will stain or damage most surfaces.

## **KITCHEN COUNTERS**

To avoid costly damage from nicks and cuts in counter tops, please use a cutting board at all times. **Tenants will be responsible for any damages to kitchen counters during move out.**

## **CERAMIC TILE - MOLDED TUB AND SHOWER WALLS**

To clean ceramic tiles and molded fixtures tiles follow these instructions:

- Dilute 1 part white vinegar in 5 parts water
- **Never use scrubbing cleansers like Comet or AJAX on molded fixtures**, as these products will permanently scratch the surfaces
- Use a soft sponge and apply the solution to the molded areas

## **MINI BLINDS**

When cleaning mini blinds, don't soak them - the finish may bubble and peel. Spray them with a mild soap & water solution and wipe them. You can buy a spray cleaner which is inexpensive and easy to use, making cleaning a breeze. Weekly dusting or wiping can save a lot of work later.

## **SMOKE DETECTORS**

Tenants are responsible for keeping fresh batteries in smoke detectors. We recommend changing batteries twice a year.

## **WOOD DECKS / PORCHES**

If you have planters or pots, please put raised trays under them so that they are off the deck a few inches. This will allow air to flow beneath the pot, and to prevent water run-off from rotting the deck.

## **HARDWOOD FLOORS**

**Never use a mop or oil for cleaning hardwood floors.** Use a soft cloth to avoid scratching the surface. It is best to sweep and dust regularly to avoid build up of dirt. We recommend cleaning your hardwood floors in your home with a small amount of vinegar in water. Periodically clean floors with Murphy's oil following the directions on the label. We encourage the use of throw rugs in front of the sink and the stove to protect these areas from water and grease.

## **MARBLE AND GRANITE**

Marble is a porous material. Be careful that water run-off from plants is not left standing

on the surface since it will permanently stain the marble. **Never use any acidic or abrasive cleaning products including vinegar.** It is best to use warm water and a sponge with a small amount of dishwashing liquid such as Dawn or Joy.
