

America the Drugged Fact Sheet

Learn the truth about the mental health industry, psychiatric drugs, electroshock and coercive psychiatric practices.

Basic information

Hundreds of thousands of Americans have died due to drugs and the efforts to prevent drug abuse have not stopped this crisis. But underneath it all is a hidden tale of addiction, violence and the greed of those who profess their intention to help.

Chemical Imbalance

There are no actual tests to determine if a person is suffering from a mental illness and the [chemical imbalance theory](#) has once again been debunked as nothing more than a marketing ploy with no basis in science, it is factually known that the drugs prescribed by psychiatry come with a long list of horrific [side effects](#) and adverse reactions.

More than one million Americans have died from drug overdoses since this drug crisis began and currently around 100,000 people are dying each year. It is a tragic situation that has garnered a tremendous amount of news coverage and funding but no success.

Dangers

The psychiatric model of treating drug addiction, commonly called [Medication Assisted Treatment \(MAT\)](#), simply substitutes one addiction for another and then labeling the affliction a mental illness, psychiatry has guaranteed themselves not only a cash cow but also customers for life.

Follow the Money

The annual budget to fight the war on drugs in the United States is now over [\\$39 billion](#) with more than a trillion dollars having been spent since 1971. This is a staggering amount of money with very little if any [positive results](#) to show from the expenditure.

Key Facts

- *Just ahead of the drug crisis, [psychiatrists voted into existence](#) “abuse” and “dependency” as mental health disorders.*
- MAT drug rehab often consists of one or more psychiatric drugs. Prescribing of multiple mind-altering drugs makes for a deadly cocktail putting the user in danger and also those around the individual.
- *There are no actual tests to determine if a person is suffering from a mental illness.*
