

A little of me

Interior design is my business and my passion. I believe that a house becomes a home when it is personalized. Your space should showcase your tastes and personality, fit your lifestyle, and perhaps make your guests a little envious.

I know that creating a home interior that inspires all of these things is not easy and I am here to help. I love what I do and I'm the best at it.

DESIGN YOUR DREAM HOME

Creating functional and stylish spaces that
 reflect your personality

Interior design

From discovering your personal style to tearing down that wall that's been limiting the open living room concept you've been wanting. I always make sure your space isn't just aesthetically pleasing, but is also a reflection of your personality.

At DD DESIGN we believe that good design is about turning dreams into reality. What are you waiting for? Share us your dreams and let's start working on your home.

Bedroom

“Your home should be the story of who you are, and be a collections of what you love” Bet on something different, let's create something original. The first step is share with us your ideas, second we make a plan according to your needs and for last we design the home of your dreams.

Outdoor

I love working on terrace and pool spaces. These spaces are meant to be places to share with our friends and family, for that reason they must be beautiful, comfortable and functional.

Bathroom

You may not know the names of some styles or have no idea what a hutch is, and that's okay. Flipping through magazines and browsing design websites can give you an idea of what you like and what you don't. Don't hesitate to bring material samples or other sources of inspiration to our first meeting. Knowing your preferences is the first step to having a successful project.

Kitchen

The process of planning a kitchen is basically determined by how you intend to use your kitchen and what features you most want therein. For example: will the kitchen primarily be used for one cook or two? Do you entertain larger groups or is the kitchen to be used by just your immediate family?
