## Mission Statement

Aerotech International is passionate about providing excellence in Aviation Technical Consultancy services, ensuring all of our clients' needs are fully achieved.

Our consultants are experienced and their key skills personally known to us, enabling us to match those skills to the right project and, where possible, in the right geographical location.

We work hard to gain the loyalty and respect of our consultants, which ensures our teams go above and beyond when supporting our clients.

## Introduction

We pride ourselves on being truly 'International'. Our completed projects span the globe, with consultants based around the world ready to support our clients. With our experienced teams and associates, we provide seamless support. We go above and beyond to assist our consultants, offering a dedicated Back Office Team to support them on every assignment. With technical and managerial advice at their disposal, our consultants are able to deliver exceptional results. We closely monitor project progress and proactively prepare contingency solutions to address any potential challenges.

Looking for more than just consultants? Choose Aerotech International for comprehensive commercial and corporate aircraft solutions, offering reliable and effective results. We are a lot more than an agency. Let us show you how and why.

- More than 180 experienced consultants worldwide
- Within our database of consultants, we proudly operate an effective hive-mind knowledge sharing platform which provides assistance, documents and information to each other
- Dedicated Travel Team supports our consultants needs and ensures the best value for our clients
- Accounts Team provides a high-quality, transparent invoicing process for our clients
- More than 50 aircraft in between leases successfully transitioned through the Isle of Man Aircraft Registry (IOMAR) on the 'M' Register
- Our daily rate not only includes the consultant's daily fee, but a range of additional support from our Back Office Team
- Isle of Man Office Support Team with more than 60 combined years in the aviation industry, including Base and Line Maintenance, Management, Regulatory and Aviation Leasing (project management, physical and records)

## Technical Support

Choose Aerotech International for comprehensive transitional and corporate solutions including:

- Aircraft Lease Transitions, Early Returns, Repossessions and Part Outs
- Maintenance Representation including Maintenance Checks and Modifications
- Passenger to Freight Conversion oversight
- Surveillance Inspections, Ad Hoc, Mid Term, Pre-Purchase and Pre-Redelivery
- Remote and or onsite Records Review and Management
- Scanning and Stream Interactive Uploading
- Engine Tabletop Inspections
- EASA CAMO seamless support through our strategic partners Celairion
- EASA Part 21 seamless support through our strategic partners Celairion and their approved partner organisations

## Transitional Support IOMAR

- Experienced NATR familiar with IOMAR requirements and processes
- Airworthiness Experts
- IOMAR Transitional Registration, C of A Support
- Continuing Airworthiness Support, including Technical Log, Deferred Defect List, Work Orders, Engineering Orders and an Interim Status

Aerotech is your trusted partner for registering your aircraft in the Isle of Man ('M' reg). With our extensive experience as Nominated Technical Representatives with the Isle of Man Aircraft Registry, we provide unparalleled support for parking and transitioning airliners and corporate aircraft.

As a company based in the Isle of Man, we have a close working relationship with the IOMAR. In fact, we were the first to register a large commercial airliner on the Isle of Man Aircraft Register. You can benefit from our expertise and experience in successfully transitioning aircraft between operators and different states of register.

## Experience

We have the experience and flexibility to provide support at all levels, from direct management of larger projects to surveys and ad hoc support. We have experience on a wide range of aircraft including the following:

- Boeing
  - 737 CL/NG, 747, 757, 777, 787
- Airbus
  - A320 Family, A330, A340, A350
- Embraer
  - 145, 170, 190
- Business Jets
- Regional Aircraft
- Helicopters
- Oversight of Cargo Conversions

## Our Associates

With the help of our associates, we can provide a turnkey solution for all your project needs:

- Celairion – EASA CAMO and EASA Part 21
- Aeroresponse Ltd – Borescope Inspections
- Spire Flight Solutions – Flight Operations
- West Coast Aviation – Aircraft Spares

## Why use Aerotech?

- All our consultants are personally known or recommended to Aerotech
- Our Technical Team thoroughly vets all consultant applications during the registration process, ensuring only experienced consultants are added to our database
- Our Back Office Support Team has wide technical knowledge and contacts to assist with your project
- On the rare occasion that we must replace one of our consultants on an assignment (such as sickness or bereavement), we work tirelessly to find a suitable replacement to limit the impact on the assignment, with little or no burden falling on our client
- Long-established relationships with lessors, airlines and MROs
