Re: Pollard Roofing

This letter is to confirm that Pollard Roofing is a qualified applicator of Garland Canada Inc. roof systems.

They have installed our systems according to Garland's guidelines and procedures. A Garland representative must inspect all Garland roof systems during the application. They are approved to install Garland Roofing systems including but not limited to:

Modified Bitumen
Metal
Built-Up
Cold Applied
Zero Odour Zero VOC
Restoration
Single Ply Roofing
Below Grade Waterproofing

Warranty lengths differ depending on type of system. Garland warrants roof systems up to 40 years for labour and material, non-prorated. The bulk of the systems at the Region of Peel Sites qualify for 25-year labour and material non-prorated warranties.

Should you need additional data please contact me at your convenience.

Sincerely yours,

Marisa Rea
Director of Operations
