REMODEL COLLECTION ▶ REMODEL. RENOVATE. OVERLAY.

Tremron's remodel pavers provide a cost benefit by eliminating the need to remove existing concrete prior to installation. All of Tremron's remodel pavers are manufactured according to the same standards as our full size pavers and are available in the same range of popular colors. This allows for a seamless transition from remodel pavers to full size pavers for patio extensions or where an existing entryway meets a driveway.

GREEN COLLECTION ▶ PERMEABLE. PERVIOUS. ECO-FRIENDLY.

Tremron's Green Collection offer aesthetic beauty, and engineered quality, while positively contributing to the surrounding environment. These specially designed pavers will reduce or eliminate storm water runoff and decrease flooding, while returning rainwater into the natural water table. In addition, Permeable Pavers also provide a sturdy paved surface for vehicular and foot traffic in parking areas, low volume roadways, driveways, patios, and walkways.

SF RIMA - NATURAL GREY

4x8 PERMEABLE ▶

The 4x8 Permeable Paver has the appearance of a traditional paver, but with oversized joints to allow for water to infiltrate through the sub base releasing into the ground below. This reduces runoff and helps filter the rain water as it is reintroduced back into the ground water supply. Produced in a 3 1/8" thickness, it can be used in both residential and heavy vehicular applications, and is compliant with the Americans with Disabilities Act.

SF RIMA ▶

SF Rima permeable pavers will reduce or eliminate storm water runoff, which decreases flooding and relieves sewer systems. With a 3 1/8" thick profile, SF Rima provides a sturdy surface for vehicular traffic, making it perfect for both residential and commercial uses. With the unique spacer design, SF Rima can be installed nub to block, or nub to nub for increased water drainage and turf growth.

In addition, Permeable Pavers also provide a sturdy paved surface for vehicular and foot traffic in parking areas, low volume roadways, driveways, patios, and walkways.

Environmental Benefits of Permeable Pavers

- **Surface Water Management**
Stormwater drains back into native soil, recharging groundwater supplies and reducing stormwater runoff
- **Reduce Landscape Irrigation Demand**
Recharges groundwater supplies
- **Minimize Local Heat Island Effects**
Permeable pavers are available in colors that have high SRI values which in turn help reduce heat island effects

The benefits of Permeable Pavers are well-documented, and their use by designers is encouraged. The United States Green Building Council (USGBC) recognizes Permeable Pavers as a best management practice (BMP) to control the quality and quantity of stormwater runoff. The USGBC Leadership in Energy and Environmental Design (LEED®) Green Building Rating System provides a variety of credits for projects that incorporate Permeable Paver Systems.

GATOR TILE SYSTEM PORCELAIN INSTALLATION

GATOR BASE

- Aids in the installation of porcelain tile
- Equivalent to 288 lbs (130 kg) of crushed stone
- Replaces 6 in (15 cm) of compacted crushed stone
- Evacuates water through the channel
- Manufactured using lightweight high-density polypropylene
- Environment-friendly and 100% recyclable
- Extremely durable, will not degrade in the ground
- Designed with a tongue and groove system

GATOR SPACERS

The creation of the Gator Tile System allows for the installation of porcelain tile directly on top of the Gator Base using the Gator Spacer to provide uniform spacing and unparalleled stability. The Gator Spacer has been designed to provide the right support, load transfer and a monolithic surface binding all units together.

The spacer can be cut into either a half- or a quarter-unit (using a utility knife) to be used along the edge of a building or the Gator Edge. Take note that the spacer bar needs to be kept in place to ensure exact spacing when laying the tile.

GATOR SPACER CALCULATIONS

24" x 24" Tiles
Square feet x 0.4 = number of spacers

18" x 36" Tiles
Square feet x 0.75 = number of spacers
