

DGnet WATCHDOG RETRIEVER

Why Deploy
DGnet Watchdog Retriever?

UNIFIED PLATFORM

- One dashboard for all your devices
- Supports any monitorable device
- Compliments existing monitoring solutions

LOW BARRIER TO ENTRY

- Low up front and monthly recurring cost
- Use DGnet appliance or an existing server
- Turn-key support gets you up and running fast

REPORTING

- Convenient tools for collaboration
- Discover ROI and performance trends
- Robust analytics capability

NOTIFICATIONS

- Tailored experience by user
- Designed to help resolve issues quickly
- Can be integrated with existing ticket systems

PROACTIVE SUPPORT

- Know about failures BEFORE the phone call comes in
- Resolve many issues remotely with supplemental control
- Reduce the number of van rolls and time on-site

DGnet Watchdog cloud monitoring platform.
Securely accessible on computers and mobile devices.

Manufacturers can
help customers
diagnose issues
faster.

Managers can run
reports for asset
utilization.

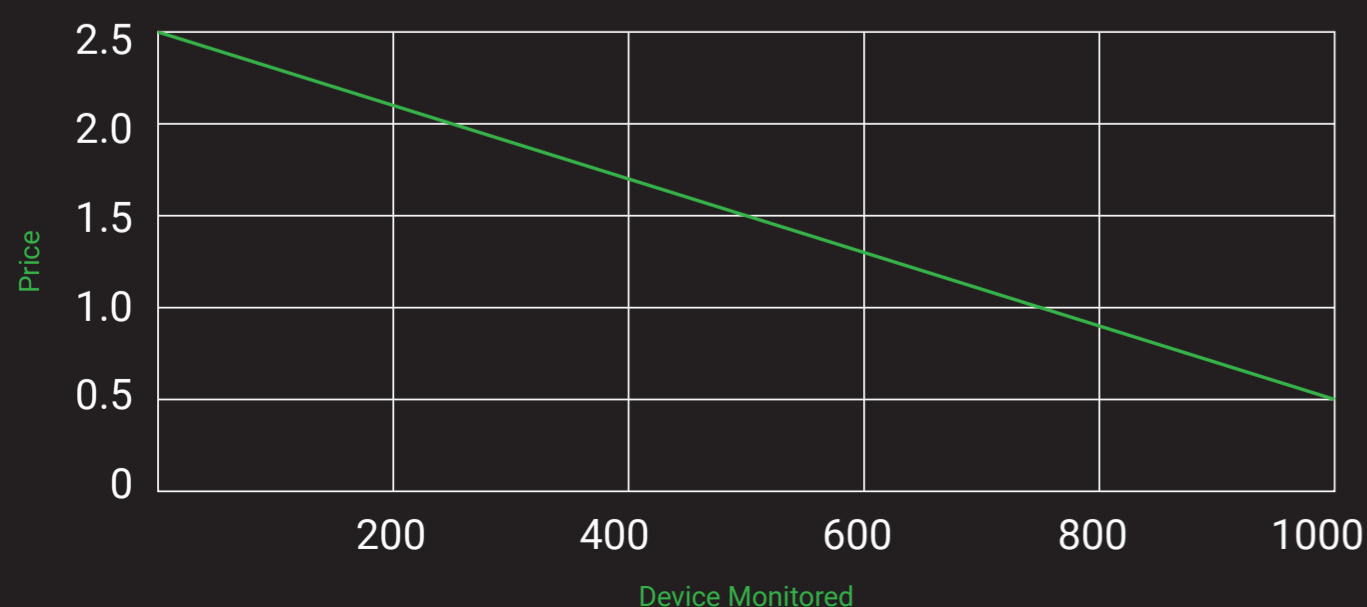

Support teams can
get notifications to fix
issues before they
impact productivity.

Building maintenance
can identify high
energy usage.

DGnet Watchdog only requires SSL outbound access (port 443) to the domain monitoring.dgnet.cloud. No inbound ports need to be opened.

Maintenance and Support for each Device
