

Summary of September 16, 2023
Four Seasons Park HOA
Emergency Preparedness and Safety Meeting

In place of our regular September business meeting, members met at the Port Angeles Food Bank at 10:00 am for a presentation by Clallam County Office of Emergency Management. Anne Chastain and Justine Chorley introduced us to the Map Your Neighborhood program and presented us with the basics of personal, home and neighborhood emergency plans. They gave us several handouts, including a "Disaster Preparedness Guide" and materials to help each household develop an emergency food cache and basic survival supplies.

The next step we need to take is to divide the Park into some smaller neighborhoods and find out which members would be interested in being trained in the Map Your Neighborhood program. All members are encouraged to take some initial steps in their own households to become prepared for an emergency, with the goal of surviving a one month long disruption of basic services.

After a lunch break, Sheriff Brian King and Lorraine Shore, Administrative Manager for the Sheriff's Office, spoke to us about the Neighborhood Watch Program and about the basic things we can do to keep our neighborhoods safe. Prosecuting Attorney Mark Nichols also addressed the group about community safety. Lorraine Shore emailed more safety information to Theresa, and Theresa forwarded that information to members whose emails she had.

Road Report:

Made it through the Motorcycle Club's Memorial day run. Only a few RV's came in from Cottonwood In. this time. I was able to stop a couple of them and turn them around to come in off S. Hemlock. Of course when they left, I think all of them went out Cottonwood In. For now, the back gate is locked again.

Road repair and brush cutting. We have accepted a bid from the Trim Reaper-David Mills for brush cutting up S. Hemlock In and patching up some of our potholes. Over the next couple weeks, He will begin with getting the brush and branches off our powerline to the well. This will include clearing around our power poles to help keep them from rotting out.. He will move then to the potholes. It will not include all of the potholes but we can get the bigger potholes and some of the smaller potholes patched this year.

THIS LOOK LIKE A DONE MEETING REPORT BUT
NO RECORD OF A MEETING TOOK PLACE
