Extreme Performance Summer

You want extreme dry street performance and are willing to trade some comfort and hydroplaning resistance to get it.

Not intended to be driven in snow or on ice, or at high speeds in deep standing water, these specially tuned tires combine big-block tread designs with aggressive tread compounds and reinforced internal constructions to emphasize dry road response, traction, handling and high speed capabilities for serious driving enthusiasts.

Standard Touring All-Season

You want all-season versatility (including light snow traction) along with enhanced handling and treadwear, as well as good noise and ride comfort.

Branded with the M+S symbol and capable of providing year-round traction (even in light snow), these tires are designed to blend a performance tire's appearance with a passenger tire's smooth, quiet ride. Standard Touring tires are typically available in the lower speed ratings and higher aspect ratio sizes and place more emphasis on ride comfort and treadwear than Grand Touring tires.

Winter

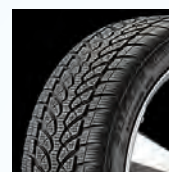

Performance Winter/Snow

You want enhanced dry road handling from your winter tires and are willing to trade some snow and ice traction to get it.

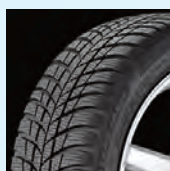

Meeting severe snow service requirements and branded with the “Mountain/Snowflake” symbol, these low profile, H- or V-speed rated tires are designed to suit winter driving on European highways. They are available in many of the low profile sizes used as Original Equipment on sporty imported and domestic cars. Due to their unique designs these tires must be installed in sets of four.

Highway All-Season

You want pleasing comfort, predictable handling and all-season on-road traction for your crossover, SUV or pickup.

These tires typically feature independent tread blocks and multiple sipes positioned around the tire to combine good on-road (including gravel and dirt roads) poise with foul-weather traction. They are branded with the M+S symbol and capable of providing all-season versatility, including traction in light snow.

On-/Off-Road All-Terrain

Your on-road and off-road travels include snow-covered roads, as well as gravel, stone, soil and sandy off-road trails.

These tires typically have as much capability off the road as they do on the road. They feature multifaceted tread blocks to help deliver traction in any direction on gravel roads and dirt trails, as well as are branded with the M+S symbol indicating their ability to provide all-season versatility, including traction in snow.

On-/Off-Road Commercial Traction

Your truck uses heavy-duty tires to provide off-road traction at work jobsites and recreation areas, as well as in snow.

These heavy-duty tires feature aggressive tread designs that generate off-road traction by biting into loose or muddy surfaces. They are branded with the M+S symbol and capable of providing traction in snow (some are even designed to accept optional studs to enhance traction on ice).

Off-Road Maximum Traction

Your off-road challenges include deep mud, loose soil, slippery rock and the toughest trails.

These typically oversize tires feature aggressive tread lugs that bite into loose or muddy surfaces to provide traction that helps propel the vehicle through muddy ruts and over slippery rocks. While many are branded with the M+S symbol and some are even pinned to accept optional metal studs to increase ice traction, their typical oversize applications, use of extra-large lugs and the absence of snow-biting sipes often challenges an Off-Road Maximum Traction tire's on-road traction in slush, packed snow and on ice.

Specialty Products Company wheel alignment and suspension tuning parts and tools. Unsurpassed range of vehicle applications and the preferred supplier to professional installers since 1972.

Accessories

NEW Tire Duffels (4-pack)

A heavy-duty tire storage bag with a strong, easy-to-carry handle slips over the tire and wheel to protect you and your vehicle from tire and brake residue.

This adjustable, heavy duty Tire Storage Rack helps organize the garage and keep extra tires or Tire & Wheel Packages out of the way.

High Capacity Rolling Tire Storage Rack
Actual tire capacity will vary with section width; 16 to 18 passenger tires are common.
Unloaded: 92" x 60" x 22"

The Rolling Tire Storage Rack stores and moves up to 8 passenger or light truck/SUV tires. High quality, 5" caster wheels for smooth rolling even when loaded. *Note: Other products shown not included*
