Company Summary

Commercial Contracting Supplies is a Native American, Women Owned, Small Business which currently stands as a sole source Sales & Distribution Provider for R-50 Insulation Panels and supplies. We provide building envelope, roofing, waterproofing materials and services for industry and Federal Government clients as well as providing technical support to clients for roof budget planning and cost analysis, leak investigations, repairs and project management. Once a problem is diagnosed, we provide cost effective materials and systems to solve the problem, whether the roof requires repair, restoration, or replacement. Commercial Contracting Supplies brings a wealth of technical support, utilizing the most modern infrared, database development and Green technologies available. We are not a large conglomerate that looks at you as one of a thousand clients; rather we are a small company that will work with you diligently to provide unparalleled service 24/7. Building Envelope Security involves energy management. On every project our methodology begins with a financial analysis to incorporate Green Solutions such as reducing heat loads with Bio Based Emisive materials. We will also provide emergency support as needed.

The patented R-50 LLC Low Profile VIP Insulation System is approved by GSA Green Proving Grounds and Oak Ridge Laboratory. The factory assembled system (Rich-E-Board) is fireproof, mold resistant and moisture resistant. It is highly sustainable with embedded energy reduction. It has high resistance to hail damage and wind uplift I-120 (ANSI FM 4474).

The R-50 LLC VIP Panels and Rich-E-Board are **100% recyclable**. These lightweight materials, weighing less than 2lbs per sq. ft., reduce transport and job site handling costs. R-50 panels last longer than the service life of a typical roof which reduces operational costs for energy, maintenance and replacement, while offering end of service life reuse options. R-50 Panels and Rich-E-Board benefit the environment by greatly reducing the volume in landfills that is required by the discarding of standard insulation. Manufactured in USA

SAM DESIGNATIONS

Dun and Bradstreet No: 114915197
Corporation Status: Native American Women Owned Small Business
Cage Code: 3D7K3
