

BOXMASTER®

Created by professional boxer Rai Fazio, the BoxMaster is designed to improve stamina, coordination, agility and cardiovascular health. Its unique design allows members to throw any punch or combination of punches, with the feel of hitting a focus mitt. This new form of boxing style conditioning excites and encourages greater participation in group fitness training and improves member retention by offering an entirely different way to get in shape.

BOXMASTER PROGRAMMING

BoxMaster comes with a total education program including training manual and scannable code that takes the user to a playlist of training videos. Instructor workshops are available to teach your staff effective training programs that accomplish total body conditioning. BoxMaster fitness programs can be an effective way to attract new members and generate revenue for your facility.

SMART DESIGN

BoxMaster is designed with the user in mind, featuring 3 easy-to-use pins for tower height adjustment and the spring arm design provides optimal strike absorption and injury prevention.

TOWER 9BM-K9401
