

MODEL C RETRIEVABLE BRIDGE PLUG

The 4-1/2" Model C Packer was designed to cover a range of 4-1/2" casing along with varying well conditions. The mean running OD is 3.375" and with a change of gage rings, elements and slip cage assemblies it can handle any size 4-1/2". It utilizes a three piece packing system supplied by MP Industries, and 4 non-directional slips to anchor the packer.

Some Feature and Benefits

- * One trip equalizing and releasing (fully equalizes before releasing)
- * Push or Pull to equalize
- * GS Profile in fishing neck
- * Upper Seal Bore
- * Can be set Hydraulically, with E-line or with Slick line depending on well conditions.
- * Elements can be re-energized by applying pressure from top.

Base Polymer (Nitrile)

Maximum Operating Temp. (90 Duro)	(80 Duro)	(70 Duro)
425f	375f	325f
