# Bridging the gap between different systems

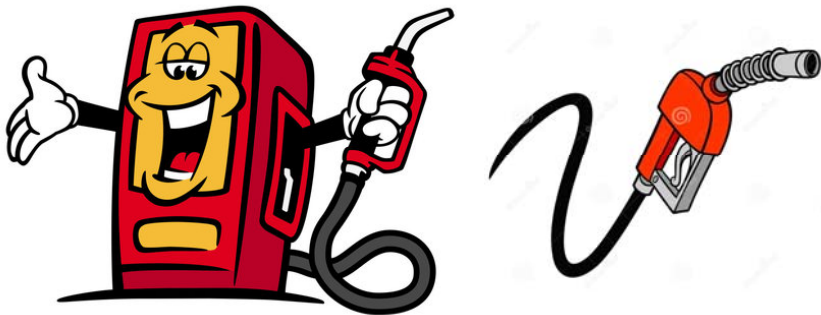

As intelligent platform and gateway, you can connect any system (wired or wireless\*) to monitor it and report.

Easy to install, to monitor and to get notifications instantly.

**Picars** Solution designed to track any activities in place, it is integrate-able system with any other software, and moreover the system can be integrated with certain kind of sensors to document its activity.

**Picars** main concern is to monitor and to report which leads always to enhance performance to reach highest standards; through this

**Picars** controls all the updates required by client as it has internal trigger output to control different devices or screens as it has internal PC to project.

## Commitment to stronger design

Picars is an endless process of development for software, hardware and integration with different systems, software and protocols. Picars standards of developing sleek and strong design can serve longer life is our main mission and concern.

### THE FIRST-OF-ITS-KIND FUEL CONSUMPTION MONITOR

Picars provides accurate information and timely operational insights readings for every single pump nozzle so you can track your daily or hourly consumption for every pump at your gas station through installing meters fits every nozzle to measure the discharged volume.

# Intelligent Dash Board and Monitoring Station

Picars philosophy once there's a trigger, PICARS sends instant to the main server per with the figures collected from the sensors

## Hub Controller

Hub Controller for commercial and residential Units.

## Picars LCD Touch Screen

Industrial Touch Screen Different Sizes IP 65

### Features

- Sleek Design
- Works as mini controller with different types of systems
- Using up to 6 inputs and 1 output
- Internal PC.

### Features

- 3mm bezel thin front panel, embedded cabinet.
- HD LCD Screen, LED backlight.
- Explosion- proof, flameproof, moisture proof
- Shock resistance standard reach GB2423.
- Anti-static level of contact 4KV, Air 8KV
- Anti Surge design.

## Reports

Different Kind of Reports on Demand for daily or hourly discharged volume can be extracted with different format.

Per gas station

Per pump station

Per Company

Per Geographic Area

Daily Summary Report
