Feng Shui | The Elements

Non-structural elements consist of the contents within a home, such as furniture and electronics. These are not fixed in place nor generally considered part of the house. If the house could be turned upside down, the non-structural elements would be those that move or fall.

Please indicate the measurements of any existing non-structural elements in the room that take up floorspace and will remain as part of the redesign. Include photos of each of these items with your project inquiry submission.
