

# Master Forensic Evidence Ledger

**Owner:** Taylor Jean Sprecher

**Purpose:** To maintain an immutable record of physical, biological, and digital evidence correlating professional deployments, logistics data, and forensic markers. This ledger serves as the primary chain of custody and truth-source against administrative record fractures.

Entry ID	Date / Time	Location / Context (e.g., VOR3, Strike Team 58)	Evidence Description (DNA, Logistics, Metadata)	Forensic Markers (Caustic Light, Rhamine 6, Thorium)	Verification Status
REF-001		VOR3 Route - North Portland	Logistics stickers with thermal ink signatures.	Captured via macro-photography for caustic alignment.	Pending Physical Archive
REF-002		Hurricane Michael Deployment	Official deployment logs vs. Verizon metadata.	Geospatial correlation to refute fraudulent marks.	In Progress
REF-003		Forensic Biochemistry - Trace	Biological markers from uniform/equipment.	Molecular stability check; Thorium-activated markers.	Secured in Glassine

## Instructions for Maintenance

- **Photography:** All physical items must be photographed before and after being placed in sterile packaging.
- **Alignment:** Note any spiritual or situational "alignments" in the metadata notes to provide context for the "Soul View."
- **Institutional Logs:** Cross-reference all entries with Employee ID 19886147 to identify discrepancies in official records.

## Archive Categories

1. **Operational:** Amazon Flex routes, delivery blocks, and Strike Team movements.
2. **Biochemical:** DNA recovery, dye applications, and trace evidence.
3. **Administrative:** Legal records, Verizon metadata, and naval transcriptions.
