VI. Discussion Items

A. Status Update on the Activities Related to the Preparation of the Groundwater Sustainability Plan

1. Update on Estimated Sustainable Yield

Steve Stuart reported that the USGS recalibrated the Yucaipa Basin Numerical Model using a historical simulation that extends from 1965 to 2014. The calculation of an annual water budget was used to estimate the estimated sustainable yield per management area resulting in the following results.

Management Area	Estimated Sustainable Yield (AFY)	Estimated Sustainable Yield (AFY)
	September 2020	May 2021
Calimesa	5,145	4,954
Western Heights	1,920	1,764
North Bench	3,400	4,176
San Timoteo	235	326
Total	10,700	11,220

AFY = Acre Feet per Year

Matt Howard reported that the USGS is conducting the final review of the groundwater model and the San Bernardino Valley Municipal Water District staff is in close contact with the USGS staff. The final model review report is expected to be available in September 2021.

2. Discussion of the revised Sustainability Criteria and Projected Conditions for the Western Heights, North Bench, Calimesa, and San Timoteo Management Areas

Steve Stuart discussed the Sustainability Management Criteria which includes identification of the sustainability goal; undesirable results; minimum thresholds, and measurable objectives. In order to determine the Sustainability Management Criteria there are several questions that need to be addressed such as:

- What does sustainable groundwater management mean for the Yucaipa subbasin?
- What is an undesirable result? and
- How do we prevent an undesirable result?

In order to address these questions, Dudek studied the historical climate record from 1966 to 2018 to categorize the climatic changes within the Yucaipa Basin area. Using this data, Steve Stuart presented historical pumping and water levels, proposed sustainability criteria and proposed Management Actions for each Management Area.

The Board of Directors reviewed data and proposed management actions for the North Bench Management Area, Calimesa Management Area, and Western Heights Management Area.

In order to continue the discussion regarding the Sustainability Criteria, the Board of Directors decided to conduct another workshop meeting on June 16, 2021, at 10:00am.

3. Discussion Regarding Measurable Objectives for the Western Heights, North Bench, Calimesa, and San Timoteo Management Areas

This agenda topic was briefly discussed during Item VI.A.2 above.

4. Discussion of the Proposed Plan Implementation and Management Actions

This agenda topic was briefly discussed during Item VI.A.2 above.
