Frequently Asked Questions

FAQ

What kind of services does Medical Temporaries offer?

We offer a full range of services designed to assist clients in the process of recruiting, screening, staffing and staff management.

What are the benefits of doing business with an American Staffing Association member?

ASA members pledge to adhere to a code of ethics and best practices—most of which deal with employee relations. Moreover, because ASA promotes legal, ethical, and professional practices for the staffing industry, its members are kept abreast of the latest developments in labor and employment laws and human resource best practices. One of the principal missions of the association is to encourage high standards of ethical conduct in dealings with employees, clients, and competitors.

What kind of pay and benefits do Medical Temporaries employees receive?

To recruit qualified productive employees, we offer competitive hourly wages and benefits that meet all the requirements of the ACA.

Why should I use staffing services instead of filling the position on my own?

Our team of recruiters constantly work for you sourcing, screening and presenting experienced healthcare candidates. This is what we do every day, which gives us the edge in finding top talent who will do the job for you. Our job is to recruit for you while you take care of your provider and patient needs.

Another important factor when using staffing is risk transfer. The exposure to compliance claims in the areas of screening, hiring and testing are very real as well as the long-term effect on unemployment rates and Workers Comp Insurance when you hire the wrong employee. By utilizing a staffing provider like Medical Temporaries you transfer that risk to us.
