

Care and Instructions

Caring for your Mopsy Mare is an important part of ownership. While each is professionally groomed before leaving our stables, your Mopsy Mare may require occasional grooming to help keep her happy, healthy and looking her best.

Mopsy Mares can shed like a real pony. If you should find any stray hairs or extra fuzz upon her arrival, please take care when trimming or removing. It is safe to use a lint brush or equivalent to help shed her out. Beyond that, caring for their mops requires only your hands. A flat mop can be fluffed with a little shake. An unruly mop can be gently primped or picked through with your fingers.

Please **DO NOT** use any type of brush or comb on her hair. This will damage or remove the hair that makes her a Mopsy.

Please **DO NOT** machine wash or dry your Mopsy Mare. Body cleaning, if necessary, should be done by dabbing or gently wiping with a soft damp cloth and allowing it to air dry.

Product warnings and care instructions can also be found on our website.
