MRS DEE CORSER

Dear Dee

The Australian Cancer Foundation has been promoting the Slip Slop Slap regime for decades. We should be slipping on more than a hat. Appropriate clothing is the most effective way of minimising sun exposure and reducing the harmful effects of our sun. The COVER'D range of products are 90 percent cotton, 10 percent lycra and provide an effective barrier to the sun. In conjunction with other protective measures they make sense. They are simple and chemical free. These garments are often an easy and effective way to protect the skin against UV radiation. Appropriate clothing should be an essential addition to our lifestyle.

Yours sincerely
Kind regards

A handwritten signature in black ink, appearing to read "Kurt Gebauer", with a long horizontal flourish extending to the right.
