THE CORPS RECALLS 10,000 COMBAT VETERANS WITH PSI ABILITIES

THE CORPS CREATES NEW MOS (0333) PSI SUPPORT SPECIALIST

Veteran Suicide : Lowest Record Since the PSI Biofeedback Therapy Implemented

SPECIAL REPORT
BY JOSE A HERRERA

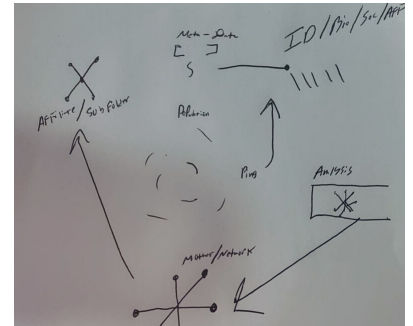

(0333) PSI Support Specialist

After years in combat zones measuring biofeedback, scientist find the synchronicity matrix and hidden language of intuition.

In the aftermath of the Washington Post's Afghanistan Paper's published December 2019 and the growing global pandemic caused by COVID-19, mental health resources declined. For all Americans, 2020 was defined by great despair. While the global pandemic left no state, city, or town untouched, it nearly decimated the men and women who served in previous wars. Retired MSgt Mark Mosher, Co-Founder of the (0333) MOS, stated, *"The work is the therapy, but to understand this, a warfighter, a veteran must be actualized. The past five years dealt a heavy blow to leaders and their ability to care for their men and women. We must remember our promise to those who risked everything as President Lincoln stated, 'To care for him who shall have borne the battle and for his widow, and his orphan.'"*

After the Pentagon announced on May 15, 2025, the new Force Design 2050 Initiative for the Marine Corps, changes within recruitment and retirement indicated that service contracts would no longer be 4 years, but rather a minimum of 15 years. Additionally, addendums also indicated that recruitment and fleet entry would be based on locality. Brigadier General John Poole, oversight chair of the (0333) program, praised the new Force Design by stating, *"Technology, was never meant to replace or substitute humans, especially our Marines, in fact, here at the Brain, we argue late into the night, that any substitute such as our previous AI enhancers, was jeopardizing real-world missions. After China's 5G network hit peak performance, data aggregation led to their SGL program, Satellite Gridlock."*

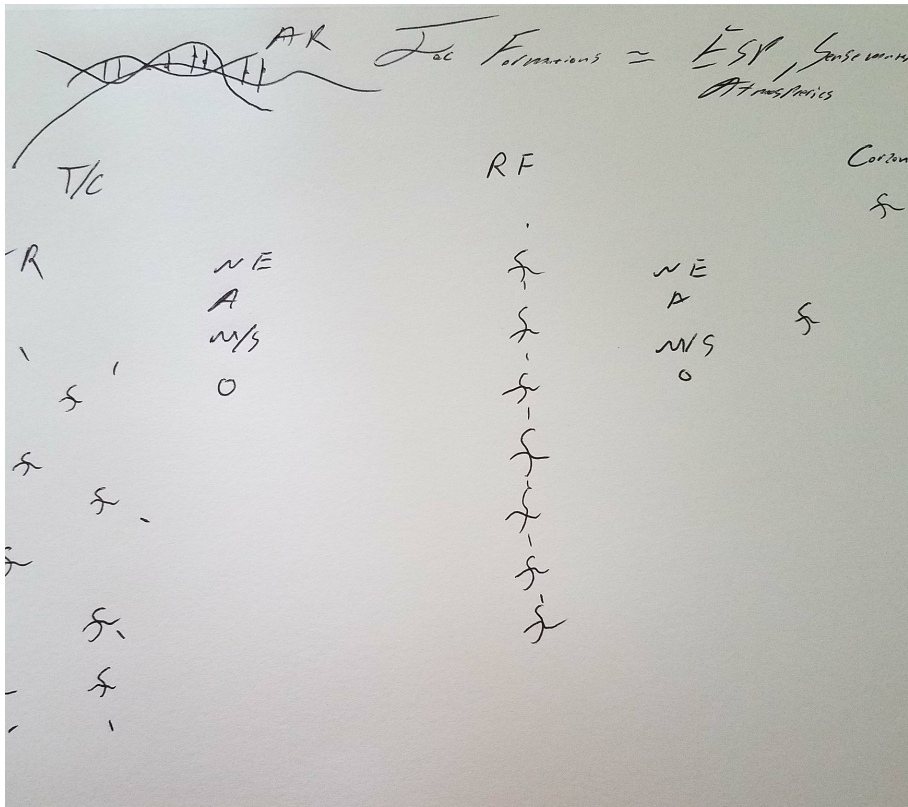

After WWII American and Russians, retrieved Nazi science projects. In the wake of the Cold War the Remote Viewing Programs flourished until the late 80's. Congress, flooded with Christian Fundamentalist, halted all remote viewing programs, leaving decades of weaponized PSI Ops in the dark. In 2021, a group of scientist and former veterans embarked on a journey to discover, how the 6th Sense worked.

The Work is the Therapy. MSgt Mosher

The Language of Intuition

Former Marines Deploy to Find a New Language

CONTINUED

"Some of us at the Brain saw the Chinese coming miles away. We knew we would be in for some rough times with all commercial manufacturing in China and our 4th Amendment rights policy. Therefore, we only integrated 1/4th of our Marine Forces with AI enhancers. Sadly, because the Chinese beat us to space with Satellite Gridlock, our tech was hacked and purposely made gimmicky, so to say."

"We had no proof China, was attacking our tech, but we knew, plausible deniability. In response to their lack of cooperation with the pandemic all our imports and manufactures went to Mexico. China suffered heavy losses, hence the retaliation."

Brigadier General John Poole, later confirmed, had it not been for the overlays finding, our Marines would have never been able to properly navigate a multi-domain technological battlespace. Jerry Rolans from Stilford Labs, later commented, "Our findings were surprising."

After preliminary studies on the Caudate and Putamen, we were hopeful that this part of the brain region would hold the answers. It turned out that specific conditions from institutional regimen helped alter the brain's physiological structures. The way Mr. Garrison explained this was an institution like the Marine Corps parallels religious institutions and rituals, which create conditions. These conditions help create a kind of precursor design or delivery system. The next step was to take a team in a real-time situation, measure glucose levels, galvanic skin response, brain waves, and see the juncture when a specific kind of information would manifest. After realizing these markers as minuscule spikes, we extrapolated baselines from the biofeedback and found what we call hidden language. Meaning, the body is talking, but it does not have a voice, only outside biofeedback. The result was each Marine carried a unique biorhythm to their bodies, which was able to be read, and when information passed, the PSI markers revealed themselves. We cannot see it, but the person having the premonition or precognition can. Oddly, no matter the distance, if a biorhythm is off, it sends an alert, and instantly a connected teammate can respond. As predicted by Mr. Garrison, the language can serve to save lives. With the high suicide rates in the U.S and the perpetual state of war, men and women can now be taught this language. Once taught, they may learn to assist teammates in a mental health crisis better or prevent battlefield deaths. Once one member receives an anomalous signal, everyone connected receives it too, causing the body to enter a heightened state of awareness."

The (0333) program enhances real-time operations, not only through mental health but also against near-peer adversaries. China can no longer hack our AI Enhancers. Part of this is because the biorhythm cannot be hacked. If a signal is hacked or mimicked by malware, its inauthentic code will not transfer to the other teammates. In essence, its code is a fingerprint. Our Marines are now more adept and capable of mission accomplishment.
