Will You Take a Stand?

Nationwide, sexually explicit and obscene materials are being pushed into our K-12 libraries and classrooms. We can't sit back and let our children be stripped of their childhood and emotional health. Pornography addiction among minors is on the rise. These books are also grooming our children for sex trafficking and pedophilia.

Did you know that K-12 libraries are exempt from the obscenity law? Yes, that means the books in our libraries are there **legally**. We can fight the system one book at a time, but they are there to stay until we change this law.

We understand the importance of intellectual freedom and access to a wide range of materials for educational purposes. However, there should be a clear distinction between protecting freedom of information and exposing our children to explicit and inappropriate content.

The onslaught of sexually explicit and obscene materials will not stop until our legislators close the obscenity loophole by passing [SB154](#) during the 2024 legislative session. Every other bill falls short, and we believe the following action should be taken.

Help us obtain signatures on this petition from Georgia to show the legislators that we understand the resolution for this issue lies in passing SB154.

Join Georgians for Responsible Libraries as a county leader to obtain signatures prior to the session. Our children and families need you.
