Departments.

# The Doc Lowe Memorial, Morgan County Fire School

Morgan County  
Fire School

## 2024 Classes

### 1. **First Responder Role in Fire Investigations**

*Instructor – Mike Stellfox – Fire Investigations are a complex endeavor and First Responders are crucial in setting the stage for a successful investigation.*

### 2. **Auto Extrication**

*Instructor – Jay Parsons – Students will be introduced to different aspects covering vehicle design, access, and disentanglement of victims while developing a planned response all the way through termination of the event.*

### 3. **Pumps Operations**

*Instructor – Don Alexander, Duncan Falls Fire Department Students learn theory, methods, and techniques for operating fire service pumps. Topics include types of pumps, engine and pump gauges, maintenance, pressure-relief devices, water supplies, drafting and pumping operations.*

### 4. **Grain Bin Rescue Instructor – OFA**

Students completing this Grain Bin Rescue Level I course gain knowledge to safely evaluate hazards associated with grain bins and successfully extricate trapped victims. Students will be using OFA's Grain Bin Rescue Trailer, review safety equipment, victim removal procedures, and conduct hands-on rescues from both a grain bin and gravity wagon.

### 5. **Structural Fire Attack Lab (Fire Blast)**

The Mobile Structural Fire Attack Lab (MSFAL). The unit supports several training scenarios including structural and transitional attack, vent-enter-search, basement fires, industrial fires, rescue, and ventilation from ground ladders.

### 6. **EMS – MedFlight – Classes will cover Trauma and Medical Topics**

### 7. **Rope Rescue –**

*Instructor – Travis Sandford This unique course will provide fire personnel with little to no rope rescue skills, as well as personnel who have had rope training in the past and wish to refresh their skills and deepen their rope understanding, with knowledge, skills, and abilities outlined by the specified JPRs.*

### 8. **Engine Company Operations –**

*Twice City Fire Tactics – Comprehensive, hands-on training in first-due engine work. Topics include nozzle selection, hose loads, and deployment, hose advancement, nozzle mechanics, water mapping, and more. \*Getting wet is guaranteed, a change of clothes is recommended. No SCBA Required\**

### 9. **Fire Behavior Lab – The OFA brings live fire into the classroom and demonstrates the destructive force and power fire has utilizing the OFA's mobile flashover trailer.**
