**THE DURATO
PROMISE**

For over a decade we have relentlessly worked towards redefining excellence in the flooring industry, powered by our commitment to quality and value.

As a minority and disabled US veteran-owned business, we take great pride and are committed to developing the best flooring options for the best value on the market. Behind every plank there is a story of perseverance, each plank a confirmation of our unyielding dedication to excellence.

Our Quantum X™ Wear Layer, is a game-changer on how we see protection and resistance.

The superiority of our products provide top line defenses against scratches, stains, and dents; products that have raised a new bar without parallel in the market.

THE FACE OF SUSTAIN ABILITY

by Durato

*But our innovation stretches beyond the necessity of performance. Our story encompasses the importance of nurturing the living environment to create products that **prioritize health + wellness.***

Our mission is to pioneer technology while putting a deep focus on the ingredients we source to ensure our products are toxin-free, and safe for humanity.

We believe that we must lead by example as a manufacturer and place the utmost importance in human health. This is a weight that takes precedence in all that we do, because building a company focused on humanity is the only way to build.

PROP 65

Proposition 65, also known as The Safe Drinking Water and Toxic Enforcement Act of 1986, is a California law with the initial goal to protect drinking water sources from toxic substances that cause cancer or birth defects and to reduce or eliminate

exposures to those chemicals in consumer products by requiring warnings in advance of those exposures, with the intended goal being that companies choose to reformulate their products without the substances rather than simply providing notice of such substances in their product. These 900+ chemicals are found in our clothing, children's toys, food wrappers, cooking accessories,

furniture finishes... our living world is inundated with cancer causing ingredients.

As a manufacturer, it is our obligation to the living environment and humanity to create products that are free of cancer-causing toxins.

Durato is immensely proud to state that our products do not contain any of the 900+ cancer causing ingredients found on the Proposition 65 list.

BREATHE EASY

Our products are manufactured to LEED and FloorScore standards for Indoor Air Quality and are certified to be free of Volatile Organic Compounds. Volatile Organic Compounds (VOCs) are chemicals found in many products used to build and maintain homes that are released into the indoor air we breathe; with Durato flooring in your space, you can breathe easy knowing VOCs are no concern.

IWBI - WELL v2 Certification features: Materials X05.2; X06.2; X07.1; X07.2; X07.3; & X08.1

Enterprise Green Communities 2020 Criteria Checklist; Criterion 6.4 Healthier Material Selection Meets both Mandatory requirement and Optional points

ILFI Living Building Challenge

USGBC - LEED v4; v4.1 Materials and Resources: Building Product Disclosure and Optimization - Material Ingredient Reporting & Material Ingredient Optimization

FloorScore Certified

Carb II Compliant for Air Quality, Formaldehyde Free

Passes Proposition 65: Does Not Contain Cancer-Causing Chemicals

Does Not Contain Volatile Organic Compounds

Does Not Contain Substance of Very High Concern

Complies with the Restriction of Hazardous Substances
