

SolonTek Security Platform

Manage, Monitor, and Protect Your Organization

SolonTek provides a holistic cyber security solution that combines management and monitoring into a single-pane-of-glass, which increases accessibility and effectiveness while decreasing the required workload.

WHY SOLONTEK?

SolonTek has mastered the art of real time security monitoring with VALKERIE™, a comprehensive yet complete overview of an entire network of people, processes, and systems. Our proprietary neural network continuously analyzes security data to find any gaps and notifies you along with steps to remediate any issues it finds, all presented in a way that is easily understandable for both management and specialists.

CONTINUOUS COMPLIANCE

With a plethora of compliance standards (Azure Security Benchmark, CMMC, PCI DSS, SOC TSP, HIPAA HITRUST, NIST SP 800-171, NIST SP CSF, ISO 27001, and more), SolonTek not only creates step-by-step guidance to become compliant, but offers continuous monitoring and support to remain compliant with any standards your environment requires.

A TOOL FOR EVERYONE

With separate dashboards for Executive Leadership, Security, IT, App Development, Governance, Risk, and Compliance teams, VALKERIE™ provides the right information to the right people at the right time.

Zero-Day Alerts

SolonTek has created an ever-evolving security solution that assists users with zero-day vulnerabilities the moment they occur.

WHAT IS HOLISTIC SECURITY?

The digital landscape is dynamic and cyber security is dependent on the security posture of several people, policies, processes, applications, tools, systems, configurations, and so much more. Most security solutions focus on one key area, not the whole picture.

SolonTek's proprietary risk methodology, predictive analysis and scoring algorithms take into account the entire environment, and how each asset affects the security of every other asset.
