

# CIRCUIT SECURITY

## Services

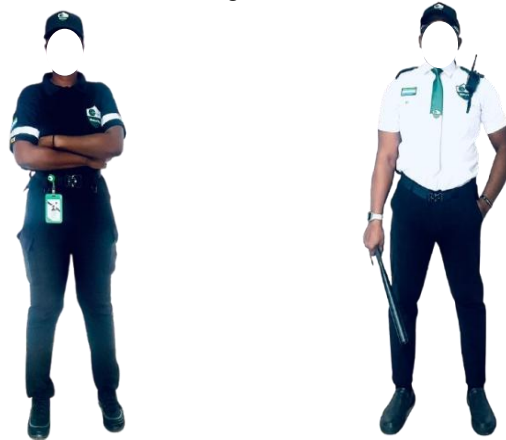

Circuit Security typically provides specialized physical guarding and site protection. In the local context, "circuit" security appearance often emphasizes:

- **Static Guarding:** Personnel stationed at residential and commercial "circuits" or perimeters in the Brookfield's and Western Area districts.
- **Visible Deterrence:** Integration of **CCTV surveillance** and electronic monitoring, which has become standard for high-tier firms in the capital.

## The Physical Circuit (Site Appearance)

A professional security circuit is visually organized to deter intruders:

Black Shirt, black Pant and Green belt for Normal guard and White Shirt, black Pant with Black belt for Supervisor

Manned security services, including guarding for premises, usually structured around hourly or monthly rates per guard, encompassing training, screening, supervision, and, if contracted, specialized equipment. Costs are generally quoted in Sierra Leone Leones (SLL) and include necessary operational taxes.

### Key Cost Components for Guarding Services:

- **Personnel (Direct Costs):** Includes competitive, screened, and trained guard salaries, covering day and night shifts.
- **Supervision & Management:** Costs for site supervisors, patrols, and management oversight.
- **Equipping the Guard House:** Security solutions often include communication devices walkie and Cell Phone.
- **Operational Overheads:** Costs associated with training, uniform, and providing secure transport if necessary.
- **Contracted Structure:** Usually negotiated based on the level of risk, required technology, and the number of personnel.

For a customized quotation, you must contact Sierra Leone directly at their Freetown office to assess the specific risk level of the location
