

The BBRB has implemented the 2018 International Energy Conservation Code (IECC) with Massachusetts amendments, which began on February 7, 2020 including a concurrency period until August 7, 2020.

All applications received now and until August 7, 2020 can choose the 2015 IECC or the 2018 IECC with Massachusetts amendments. Not allowed is mixing requirements from each edition.

This change does not, however, change the current Stretch Energy Code for those who are Green Communities.
