

## Risk Assessment for First Aid

RISK RATING = Likelihood x Severity

LIKELIHOOD

1 = Unlikely

2 = Possible

3 = Will happen

SEVERITY

1 = Minor Injury

2 = Major Injury

3 = Death

RATING RESULTS

1 – 3 = Low Risk. Monitor and Review periodically.

4 – 6 = Medium Risk. Implement Further Control Measures

7 – 9 = High Risk. Not Permitted Until Risk Rating Reduced

Main Hazards				Who might be harmed?			
Slips, Trips and Falls Crossing roads (Traffic) Children getting lost Members of the public Poor weather conditions			Risk Rating with no controls		Any member of the group Any member of the group Children Any member of the group Any member of the group		
Hazard	Likelihood	Severity	RATING No controls	Control Measures	Likelihood	Severity	RATING With Controls
Inadequate provision of first aid	2	1	2	• The Trust has 13 First Aid trained members of staff whose names are displayed in prominent places throughout the Trust.	1	1	1
Insufficient first aid supplies are available on site	2	1	2	• School leaders are responsible for ensuring that all first aid kits are fully stocked • Supplies will be suitable to deal with all types of injuries and guidance is sought on the H&S website • First aid kits are available within controlled points throughout the school, such as the school office, first aid room, headteachers office, kitchen	1	1	1
Trips, falls and bumps to the head	2	1	2	• All injured students must see a first aider • Students will receive a cold compress as required and first aid treatment • Minor accidents are recorded in the first aid log • Phone calls to parents as required	1	2	2
Anaphylaxis	1	3	3	• EpiPens on site for individual students with permission from parents	1	2	2
Anaphylaxis	1	3	3	• EpiPens for general use are not on site	1	3	3
