50 Years Strong....and Growing!

There is no better industry than the lawn & garden industry. It is comprised of ethical, passionate and hard-working people that work every day to create a better tomorrow. We have a common bond to protect our environment and to respect the dirt of this wonderful earth.

For 50 years, the DeWitt Company has been committed to developing environmentally responsible products to help protect the future. Let's all work together towards building a better tomorrow.

Fabrics for Every Reason

...Products for Every Season!

A COMPANY BUILT FROM THE GROUND UP

Larry DeWitt started his own landscaping business in Sikeston, Missouri, soon after earning degrees in horticulture and landscape design. In 1977, he was looking for a material to stop weeds and increase plant growth - without chemicals. Black plastic was a landscaper's only option. From hands-on experience, he knew that while plastic stops weeds, it also blocks out moisture and air. The result: disease, fungus and rot.

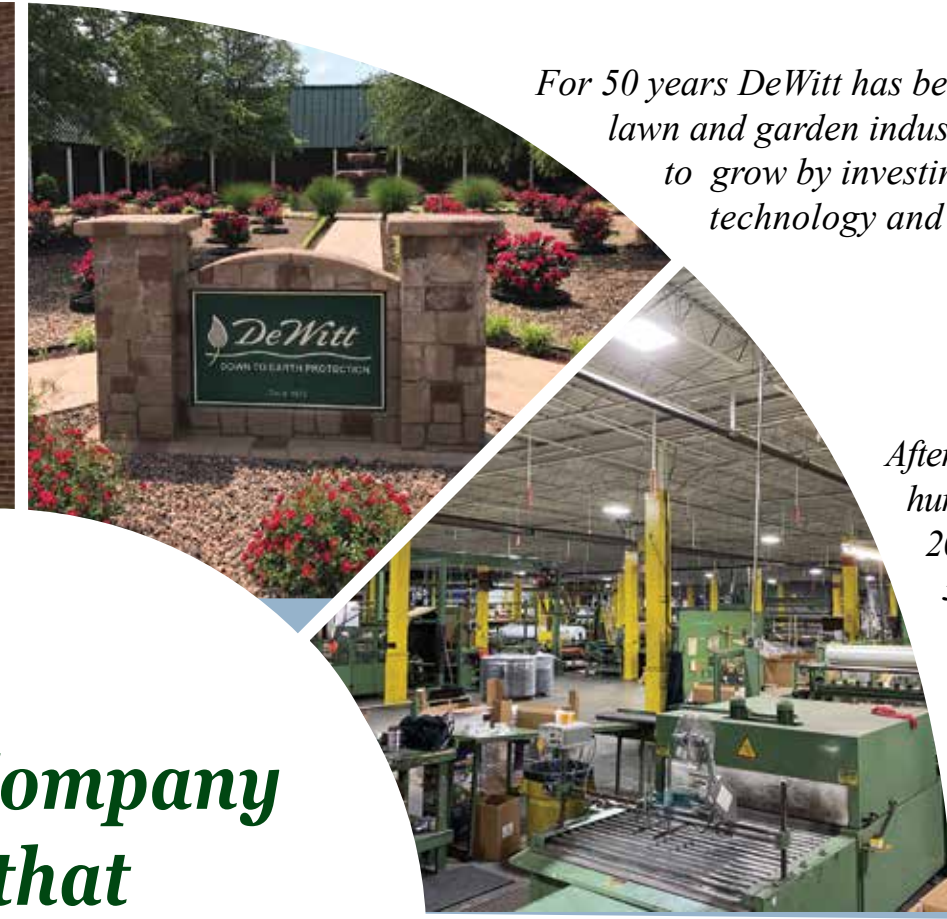

Unsatisfied, Larry decided to create something better. He experimented with textiles and materials until finally hitting pay dirt. He discovered that woven polypropylene did everything he wanted. And his new "landscape fabric," later dubbed DeWitt's Weed-Barrier® changed the professional landscaping industry.

Pros quickly realized what an outstanding product DeWitt's Weed-Barrier® was. It halted weed growth and promoted tremendous plant growth. The industry couldn't get enough. As a result, DeWitt products are used in more than 70% of the commercial landscaping done throughout the United States. That makes the company the #1 Choice of Landscape Professionals.

Additional 80,000 sq. ft. Warehouse Includes 13 New Docks

A COMPANY DEDICATED TO THE INDUSTRY

For 50 years DeWitt has been dedicated to the lawn and garden industry and continues to grow by investing in state-of-the-art technology and equipment.

After outgrowing our humble beginnings, in 2000 we moved into a 300,000 sq ft facility in the heartland of America.

...A Company that Continues to Grow!

To better meet the needs of our customers, in 2017 we expanded our operation to 420,000 sq ft.

In 2022, we added an additional 80,000 sq ft warehouse which included 13 new docks to better serve our customers. Today the DeWitt Company operates out of a 500,000 square-foot facility located in the heartland of America.

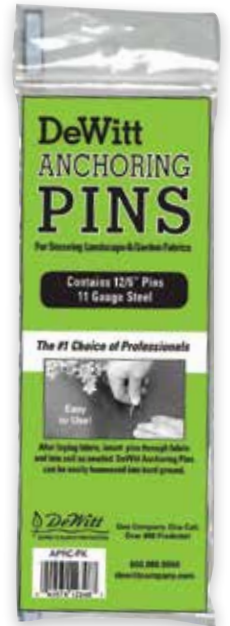

Accessories

DeWitt Offers Every Accessory You Need to Complete Projects!

DeWitt Anchor Pins

DeWitt Anchor Pins properly secure and anchor landscape fabrics, ground coverings and drip irrigation tubing. These special steel pins are angled at their ends for faster and easier installation. Use Anchor Pins to permanently and professionally anchor all of our fabrics.

Biodegradable Stakes

Made in the USA, Biodegradable Stakes are manufactured using recycled materials (polypropylene) with an additive to cause stakes to breakdown and biodegrade. The new ribbed design allows for significantly more holding power than metal staples. Great for securing landscape fabrics and netting. Other uses include pinning down turf grass, anchoring erosion control blankets and mulch mats. Use these biodegradable stakes in yards, parks, or schools.

Green Fabric Pins

Green Fabric Pins are made from recycled plastic. They are noncorrosive, sturdy, easy to install and reusable. Fabric Pins can be used to secure landscape fabrics, erosion control products and plant protection products. For best results, pins should be spaced every 2' to 3' around outside edges. For lighter weight products, it is highly recommended to fold over edge and push pin through double-layered material.

Black Stallion® Rubber Straps

Molded of 100% EPDM, Black Stallion® Heavy Duty Rubber Straps provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to ensure each strap delivers excellent performance and value. The Rubber Straps are manufactured with the graduated TEARDROP design at each end for added strength. The "S" Hooks are made of silicon kiln-tempered and galvanized steel for extra strength and rust protection. The Rubber Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion® Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Flexible Intermediate Bulk Containers (FIBC)

The DeWitt Flexible Intermediate Bulk Container, (FIBC) is a standardized container in large dimension for storing and transporting dry, flowable products, such as sand, fertilizers, mulch and rock. The DeWitt FIBC container is manufactured from quality woven polypropylene and tested to meet tear and UV resistance standards, making it strong and durable. FIBC bags compact when empty for storage, are 100% recyclable and reusable. DeWitt's FIBC bags are routinely used by landscapers, contractors, manufacturers and distributors to transport, protect and store up to 2,000 pounds, or 1-ton of dry goods.

Aquatic Protection

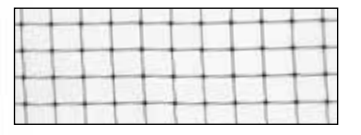

DeWitt Quality Products to Support Pond and Water Projects

Bird & Pond Netting

DeWitt Bird & Pond Netting is a durable, UV-treated polypropylene with 3/4" hole openings that allows in sunlight, moisture and ventilation. It is a safe, humane pest protection for fruit and vegetables or can be used to protect fish and water life from predators. Also safely deters children and pets from the protected area. Netting helps keep leaves and harmful debris out of pond water to stay cleaner and healthier for optimum life which extends the life of the pond.

POINT OF PURCHASE DISPLAY/RETAIL PKG COMPONENTS

All Purpose Stakes

Ideal for lawn edging and landscape pavers. Stakes come in 12 packs and are heavy-duty plastic. Stakes provide support for tough lawn jobs. Made in the USA.

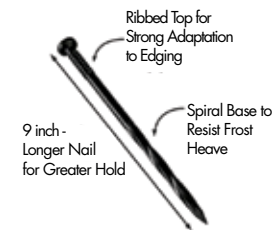

- Heavy Duty Poly Stakes
- Twelve 9" Poly Stake per package
- Uses include lawns, pavers, tents and camping

GEOGRID FOR GROUND STABILIZATION

Geogrid is geosynthetic material used to reinforce soils and similar materials. Geogrids are commonly used to reinforce retaining walls, as well as subcases or subsoil below roads or structures. Soils pull apart under tension. Compared to soil, geogrids are strong in tension. This fact allows them to transfer forces to a larger area of soil than would otherwise be the case.

Erosion Control & Geotextiles

Biaxial GeoGrid 2K Series

DeWitt Biaxial GeoGrid 2K Series provides ground stability, separation of sub-grade and aides in drainage and filtration. The geogrid-reinforced soil matter becomes part of the retaining wall system, giving the system more size and weight to resist pressures from behind it.

ITEM #	DESCRIPTION	UPC	SCC	WT	PK	PK/CS
GG2K-450	4' X 50' GEO GRID 2K SERIES 10/CASE	826001	505548	117	1	10

GG2K-6150	6' X 150' GEO GRID 2K SERIES CLR	826025			1	1

Biaxial GeoGrid 3K Series

DeWitt Biaxial GeoGrid 3K Series adds greater stability to multiwall strutures while maintaining separation of subgrade and adding drainage and filtra-tion. As a wall gets taller, it needs longer geogrid lengths to increase the size of the geogrid-reinforced soil matter.

ITEM #	DESCRIPTION	UPC	SCC	WT	PK	PK/CS

Reduce Maintenance Costs While Conserving Water With DeWitt Erosion Control & Geotextile Products

AN INNOVATIVE GEOTEXTILE GRID FOR USE IN GROUND STABILIZATION

DuPont™ GroundGrid®

DuPont™ GroundGrid® ground stabilization system is a geotextile grid used for ground stabilization in landscape and construction projects. Simply expand the three-dimensional honeycomb structure, place it on your project surface and fill with gravel, soil, sand or other mineral infill to create a strong and stable surface.

GroundGrid® uses DuPont science to create an uncommonly strong and stable surface for your job site. So it's lightweight but tough enough to work hard and last for decades in any conditions. Water permeable in both vertical and horizontal directions, for drainage and erosion control.

WOVEN GEOTEXTILES

DeWitt HARDSCAPE PRODUCTS
GEOTEXTILE
Woven Fabric 200 LB

Woven Fabric
Provides Stability and Separation of Subgrade in Pavers or Retaining Walls

Applications

- Helps stabilize foundation of paver projects
- Can be applied for driveways, pathways, sidewalks and retaining walls
- Can be used for soil separation

Benefits

- Improves long term performance of hardscape project
- Cost effective solutions for reinforcement applications
- Extra resistant to punctures and tears
- Reduces extra excavation and backfill!

HOW TO INSTALL
Excavate, level and pre-compact the selected area.

Apply DeWitt Woven Geotextile, then cover and level with sand or aggregate to ensure a perfect paver installation.

DeWitt
One Company. One Call. Over 600 Products!
800.888.9609 • dewittcompany.com

Woven Geotextiles are high-quality polypropylene fabrics that stabilize the sub grade and separate soil from the aggregate. With everything in place, you'll experience a reduction in maintenance costs and extended life of your pavement structure. These fabrics work well for unpaved structures as well.

DWG200 Series

- Industry-standard woven geotextile
- Designed for three primary functions – separation (separating the native sub-grade from an aggregate layer), reinforcement (reinforcing an area by distributing weight over a wider area) and filtrating (retaining soil while allowing the passage of water)
- 200 pound grab tensile strength
- Used underneath an aggregate overlay

DeWitt DRIVEWAY FABRIC

Commercial Grade Woven Geotextile 12.5' X 60'

- DeWitt Driveway Fabric is a permeable textile that increases stability
- Easy to install and covers 750 square feet
- Prevents ruts and potholes
- Allows water to filter
- Underlayment for construction entrances, soil separation, stabilization for sidewalks, stone pavers, rock, concrete, riprap, and gabion lined swales

DeWitt Hardscape Products
FILTER FABRIC
Non-Woven Fabric

Non-Woven Fabric
Used for Drainage and Filtration

Applications
Drainage control
Erosion control
Behind retaining walls
Landscape projects

Benefits
• Allows high-water flow
• Soil separation for added stability
• High strength/dimensionally stable

HOW TO INSTALL

Filter Fabric

DeWitt non-woven, needle-punched Filter Fabric can be used as a stabilizing force to prevent unwanted movements in excavated areas such as roads, sidewalks, patios, and embankments. This product is excellent protection against damaging soil when placed around drainage pipes, retaining walls, and buried or exposed fixtures.

SEED GERMINATION AND EROSION CONTROL BLANKETS

FiberGuard 200

FiberGuard 200 is made of natural Aspen wood fibers and designed to expand and hold seed and fertilizer in place and offer temporary protection during germination. Dyed green to look like grass.

FIBER FEATURES

- Natural Aspen wood fibers
- Dyed green to look like grass
- Expands to hold seed and fertilizer
- Lightweight and easy to use
- Prevents soil erosion
- Faster germination
- Saves water
- 4 ft. x 50 ft. • 200 sq. ft.
- Single photodegradable netting on top of wood fibers
- Safe for home, children & pets

StrawGuard 200

StrawGuard 200 is designed to provide temporary protection for grass seed and topsoil during the germination and revegetation and root system development stages. It is lightweight and easy to handle.

STRAW FEATURES

- Natural straw fibers
- Faster germination
- Seed doesn't wash away
- Prevents soil erosion
- Non-toxic, biodegradable
- Lightweight and easy to use
- 4 ft. x 50 ft. • 200 sq. ft.
- Single photodegradable netting on top of straw fibers
- Safe for home, children & pets

Straw TackSak

Straw TackSak is a sack of straw seeding mulch designed to stop erosion and speed up germination. TackSak is made of finely processed straw, cut twice and processed with a bonding agent that gives straw a tackiness which holds it together and protects grass seed from heavy washout, runoff and wind. TackSak conserves water, naturally biodegrades and is safe for pets and children. It also makes great bedding for livestock. Easy to use, handle and clean up. Covers up to 500 sq. ft.

DeWitt Offers a Complete Line of Durable Ground Covers!

No one has more experience with Ground Covers than the DeWitt Company! With 50 years of experience in the production of permeable weed control fabrics, the DeWitt Company pioneered the field and was the first to offer the technology. DeWitt offers the best selection of quality woven ground covers in the market.

CONSERVATION GROUND COVER

Sunbelt® (3.2 oz.)

- Resists tearing or puncturing
- Striped for plant alignment
- Durable & longer lasting
- Edges lay flat, stay flat

Reflective White/Black Woven (3.8 oz.)

- Resistant to tearing and puncturing
- Striped for plant alignment
- Reflective white fabric on top increases yields
- Black fabric underneath blocks sunlight from reaching weeds

UltraWeb 3000 (2.2 oz.)

- State of the art weaving
- Light weight & easy to use
- Water conservation
- Wider widths available

White Ground Cover (3.2 oz.)

- Resistant to tearing and weed penetration
- Protects against frost by holding in heat
- Excellent for rose growing operations
- Permeable fabric allowing water and nutrients to pass through

Ideal Choice for Safe Weed Control & Water Conservation

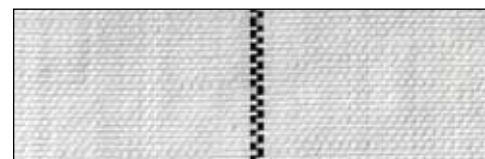

UltraWeb 3000

By applying the latest in state-of-the-art weaving technology, UltraWeb 3000 delivers a superior UV-treated ground cover for less than the cost of common 6-mil black plastic. That's right, UltraWeb 3000 can save you money! This unique woven polypropylene ground cover is the ideal choice for safe weed control and water conservation. *Wider Widths Available.*

Protecting Our Future One Product at a Time

White Ground Cover

White Ground Cover is a 3.2 oz., UV-stabilized, white woven polypropylene fabric. It is a strong, heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. White Ground Cover can also be used as an alternative to a frost blanket. When applied on top of plantings, it protects against light frost and cold temperatures by holding heat in during the day and by blocking wind at night. White Ground Cover is permeable, allowing water and nutrients to pass through. It is excellent when used in rose growing operations.

Ground Covers Resist Tearing, Puncturing & Weed Penetration

Sunbelt®

Our Best — Sunbelt® Woven Ground Cover consists of 3.2 oz. polypropylene, which resists tearing, puncturing and weed penetration. It is approved for most government weed control applications. Sunbelt® is ideal for greenhouses, outdoor displays and as a weed barrier for plantings without topical coverings where a weed-free environment is a must. DeWitt Sunbelt® is striped every 12 inches to aid in plant alignment and is UV-stabilized to last even in direct sunlight.

Reflective White/Black Woven Ground Cover

Reflective White/Black Ground Cover is a 3.8 oz., UV-stabilized, white woven polypropylene fabric woven to a black polypropylene fabric. It is a strong, heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. Reflective white fabric on top - increases yields by allowing the lower canopy of plants to receive light exposure. Black fabric underneath blocks sunlight from reaching weeds. Reflective White/Black Ground Cover is permeable, allowing water and nutrients to pass through. It is excellent when used in growing operations. DeWitt Reflective White/Black Ground Cover is striped every 12 inches to aid in plant alignment and is UV-stabilized to last even in direct sunlight.

A landscaper wearing a blue cap, blue shirt, and green overalls is kneeling on a black landscape fabric. He is using his hands to secure a small red-leaved shrub into a hole cut in the fabric. A brown irrigation pipe is visible running across the fabric. In the background, there are various other plants, including a tall green tree and a yellow bush, all set against a backdrop of more landscape fabric.

DeWitt
Difference!**

Spunbond Landscape Fabrics

Characteristics:

- Polypropylene
- Made from one continuous fiber for consistent strength
- Versatile-great for hardscapes and xeriscape applications

Benefits:

- High Strength
- Easy to install
- Great for weed control
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Hardscape Applications
- Soil Separation
- General Weed Control

Pointbond Landscape Fabrics

Characteristics:

- Polypropylene
- Low cost
- Several weights to choose from

Benefits:

- Easy to install
- Provides great weed control
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Economical Weed Control (Standard 15 yr)
- Professional Weed Control (Weed Barrier Pro)
- Soil Separation

Woven Landscape Fabrics

Characteristics:

- Polypropylene
- Heavy duty
- Stripes every 12 inches
- Heavy UV Protection without using a mulch/rock cover
- Versatile- great for hardscapes and xeriscape application

Benefits:

- High strength
- Great for weed control
- Stripes for easy plant alignment
- Allows air, water and nutrients to pass through
- Conserves water

Practical Uses:

- Professional Weed Control
- Soil Stabilization
- Hardscape Applications

Woven Ground Cover

Characteristics:

- Polypropylene
- Stripes every 12 inches
- Resists tearing and puncturing
- Edges lay flat and stay flat

Benefits:

- High strength
- Great for weed control
- Stripes for easy plant alignment
- Can be left uncovered
- High UV resistance
- Conserves water

Practical Uses:

- Nursery/Garden Center Flooring
- Weed Control
- Soil Stabilization

Geotextiles Non-Woven & Woven

Non-Woven Characteristics:

- Polypropylene
- Higher elongation (stretch)
- Versatile for many uses
- High water flow

Non-Woven Benefits:

- Prevents soil erosion
- Soil separator/filter fabric
- High water flow

Practical Uses:

- Soil Separation
- Filtration
- Drainage
- Underlayment Fabric

Non-Woven:

- Filter Fabric, DNG105 Series, DNG120 Series & DNG205 Series

Woven Characteristics:

- Polypropylene
- High strength
- Lower elongation (stretch)
- Lower water flow

Woven Benefits:

- Stabilization of soil
- Lower risk of puncture
- Reduces amount of required base materials

Practical Uses:

- Soil Stabilization
- Base Reinforcement
- Structural Support
- Underlayment

Woven:

- DWG200 Series & DWG315 Series

- Allows Water, Air & Nutrients to Pass Through

*Conserves Soil Moisture,
Increases Growth and Stops Weeds*

Natural Organic Biodegradable Weed Barrier

Garden Weed-Barrier

Economical, lightweight paper mulch that helps control weeds and is 100% organic and an environmentally responsible alternative to black plastic. Made from recycled paper and certified by the Forest Stewardship Council®, DeWitt Garden Weed-Barrier is the choice for organic weed control.

DeWitt Garden Weed Barrier is perfect for vegetable gardens and designed for annual plantings. Garden Weed Barrier stops weeds, helps conserve moisture and doesn't interfere with the natural balance of the land. The paper mulch naturally biodegrades and can be tilled back into the soil, putting nutrients where they belong.

DeWitt's Full-scale Commitment to the Shade Cloth Market

Sports & Recreation Screens

Garden & Construction Area Screens

DeWitt Shade Cloths are Designed to Provide High Quality Sun and Screen Protection

- CUSTOM**
- BATTEN TAPE
- HEM • SEAM
- GROMMET
- CUT DOWN

Due to the high seasonal demand of this product, DeWitt has finished stock panels in many sizes and percentages. These are available for immediate shipment. The professionals on DeWitt's sewing production team can customize panels to any percentage of shade. We use #4 brass grommets and 2 3/4" reinforcement tape. The taped edges are double stitched for extra holding power. Please call for custom quotes and lead times.

Custom Knitted Shade Cloth

Knitted Shade Cloth

DeWitt's Knitted Shade is made from 100% UV stabilized polyethylene. Its unique lock stitch construction allows customers the ability to cut the fabric with scissors without further unraveling. Knitted Shade is available in a variety of colors, stripes and shade densities.

Aluminet shade cloth is an aluminum foil knitted screen cloth with a very high reflective quality that will reflect the sun's hot rays away from your structures.

Sudden Shade

DeWitt's Sudden Shade is made from 100% UV-stabilized polyethylene. Its unique lock-stitch construction allows customers the ability to cut the fabric with scissors without further unraveling. Sudden Shade is pre-cut at 6' x 12' and 12' x 12', which greatly reduces delivery times. Available in green and black. Kit includes Clip-Its™ and rope for installation.

DeWitt Insect Netting

Reduce crop damage without the use of pesticides with DeWitt Insect Netting. DeWitt Insect Netting can be used over fruit trees, or as a row cover for plants to protect them from bugs such as Tobacco Whitefly, Japanese beetles, wasps, grasshoppers and many more. It can also prevent birds from eating seeds and seedlings and act as a barrier to damaging hail. DeWitt Insect Netting allows sunlight to reach plants while letting air and moisture pass through.

Tarps

DeWitt Offers a Complete Professional Line of Tarps for Various Applications

Super Blue® Tarp - UV 2.3 oz.

SuperBlue® Tarp is the ideal high volume tarp. Its signature blue color instantly identifies strength and value to the consumer. SuperBlue® has become the preferred choice because of its low cost and convenience. Construction features include 2.3 ounce per square yard, 8 x 8 sq. in. count, with heat sealed seams and 3/16" bolt roping in hem. Aluminum rust proof grommets about every three feet around the hem, 5-6 mil thickness with UV resistant top and bottom. Blue on both sides.

Heavy Duty Forest Shade™ Tarp-UV 4.5 oz.

An environmentally compatible color visually recedes in outdoor setting. This heavy duty tarp weighs 60 % more than most polyethylene tarps. Tightly woven fabric provides more puncture resistance. Thicker coatings on each side adds longer product life. Black anodized grommets about every 3 feet around the hem, 10 mil. thickness with UV resistant top and bottom coating give added strength and securing dependability. Green on both sides. Many applications include firewood cover, patio furniture cover and building supplies.

Knitted Stock Tarps

DeWitt's Knitted Stock Tarps are UV stabilized with lock-stitch knitted construction. They are heavy duty and pliable. DeWitt Company has a complete line of Knitted Stock Tarps, making it easy to choose one that is right for any application. Knitted Stock Tarps many uses include shading people, plants, pets, and greenhouse shading.

Due to the high seasonal demand of these products, DeWitt has finished stock panels in many sizes and percentages. These are available for immediate shipment. The professionals on DeWitt's sewing production team can customize panels to any percentage of shade. We use #4 brass grommets and 2 3/4" reinforcement tape. The taped edges are double stitched for extra holding power.

SunShield® Silver/Black Tarp - UV 6.0 oz.

The SunShield® Silver/Black 6 oz. tarps are very rugged and designed for use under continuous outdoor exposure. SunShield® is made with high density woven fabric along with UV treated coatings on both sides to provide extended life in the sunlight. In addition, using SunShield® with the reflective silver side up will divert both heat and ultraviolet light, while using the black side up will absorb heat/divert ultraviolet light. Both sides are heat and cold resistant. SunShield® is also an excellent sunblock fabric. The tarps include patent pending molded reinforced corners, rust proof grommets every 24 inches and bolt rope hems to provide dependable tie down points. Suggested uses include material covers, recreational vehicle covers, pool covers and rolled hay covers.

TARP ACCESSORIES

Black Stallion® Rubber Straps

Molded of 100% EPDM, Black Stallion® Heavy Duty Rubber Straps provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to ensure each strap delivers excellent performance and value. The Rubber Straps are manufactured with the graduated TEARDROP design at each end for added strength. The "S" Hooks are made of silicon kiln-tempered and galvanized steel for extra strength and rust protection. The Rubber Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion® Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Tarps For Many Reasons

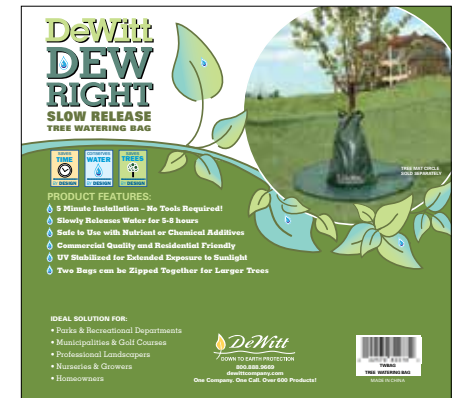

Tree Care

DeWitt Offers a Full Line of Quality Tree Care and Tree Protection Products

Tree Bags & Tree Mats Block Weeds and Conserve Water

DeWitt Dew Right Tree Watering Bag

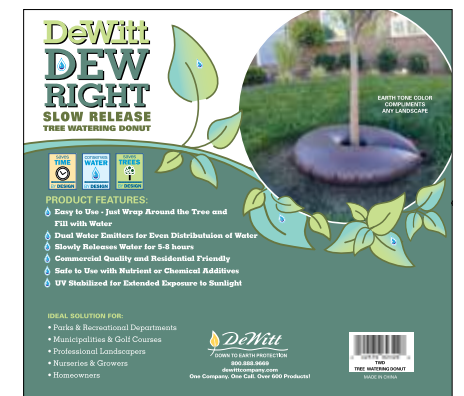

Take the stress out of planting new trees with the new DeWitt Dew Right Tree Watering Bag; a 15 gallon bag designed to provide a drip irrigation system directly to tree roots over an extended period of time. Made of heavy duty green coated polyethylene with nylon webbing, poly straps, and black nylon zippers, the DeWitt Dew Right Tree Watering Bag has micro-perforated release points along the bottom seams for a slow release of water. Safe to use with nutrient or chemical additives, the bag needs to be filled 1-2 times per week for most trees. Zip together 2 bags for trees 3"--5" caliper to hold 30 gallons.

DeWitt Dew Right Tree Watering Donut

Take the stress out of planting new trees with our slow release tree watering donut. Designed to ensure that your new trees will survive their crucial first year after being planted. It eliminates the severe water stress new trees endure after transplanting by delivering a high volume of water directly to their root system. Easy to use, just wrap around the tree and fill with water. Dual water emitters distribute water evenly. Slowly releases water for 5-8 hours.
