INNOVATIVE DESIGN

110 stronger reinforced window frames can significantly reduce energy loss by preventing drafts and maintaining a better seal. This, in turn, can contribute to lower heating and cooling costs. The structural support offered by modern aluminium alloys can easily support the weight of heavy glass panes.

- Profile thickness: 2.8mm Frame
 - Depth: 112mm
 - Frame Width: 25mm
 - Sash Width: 70.4mm
 - Glass Standard:
 - 5G+27A+5G (Tilt & Turn)
 - 5G+20A+5G (Outswing)
 - Hardware: SIEGENIA Mesh: 304
- ss/316 ss/Nylon
