

Brisart Ecosystem License

This is the single license governing use of the Brisart software ecosystem:

- BrisartResearchArchive,
- BrisartDevTools,
- BrisartPreservationTools,
- BrisartIdentityTools,

and any future Brisart project.

1. Free, No Subscription Required

Anyone can, at no cost, for non-commercial purposes only:

- Download and run official releases
- Read the source code
- Use it personally, academically, or internally within an organization

That's it. No forking. No modifying. No redistributing. No selling anything built from it. Reading and running the official, unmodified release is the entire free grant.

2. What a Subscription Unlocks

An active subscription — any tier — grants four rights, and only while the subscription stays active:

1. **Fork** the source code
2. **Modify** it privately
3. **Sell or commercialize** anything you build from it
4. **Submit implementation requests** (feature/capability suggestions Brisart may or may not build)

All four require a currently active subscription. None of them are one-time — they're rented, not owned.

3. If You Cancel

Everything in Section 2 stops the moment your subscription lapses — including the right to keep selling something you already built and shipped while you were subscribed. There is no grandfathering. If you built a commercial product while subscribed and later cancel, you must stop selling it unless you resubscribe.

Resubscribing restores your rights going forward. It does not retroactively cover the gap.

4. Pricing

Tier	Price	Who it's for
Individual	\$49.99/month	1 person
Research Lab	\$499.99/month	Up to 15 people, one lab/org
Institutional	\$4,999.99/month	Unlimited people, one org

Every tier grants the exact same rights. Price and seat count are the only differences.

5. Everything Else

- **Official releases only** come from Brisart-controlled repositories, the official website, or explicitly authorized channels. Anything else isn't covered by this license.
- **Donations** are separate from subscriptions. Anyone can donate. It supports the project but grants no rights — not even implementation requests.
- **Terms can change at any time, for any reason, at Brisart's sole discretion.** The current published version of this license always governs, effective immediately upon publication.
