

Brisart Licensing

The central source of truth for licensing and ecosystem participation across the Brisart software ecosystem.

Covered Projects

- BrisartResearchArchive
- BrisartDevTools
- BrisartPreservationTools
- BrisartIdentityTools

and any future Brisart project, unless that project states otherwise.

What's In This Repository

File	Purpose
LICENSE.md	The only legally controlling document. Covers free-use rights, what a subscription unlocks, cancellation terms, and pricing.
PARTICIPATION.md	Non-binding guidance on donations and implementation requests — what they're for, how they're reviewed, and what to expect. Does not grant or restrict any rights; see LICENSE.md for that.

Philosophy

Brisart software is built local-first, auditable, and dependency-conscious, first to support the operational needs of the Brisart ecosystem itself. Organizations with similar

requirements may benefit from the same ongoing development, through the terms in
`LICENSE.md`.
